## Plant Descriptions

The following pages contain brief descriptions of most cultivars and species of conifers we have. Currently our data base lists well over 1000 species and varieties. However, we do not propagate every listing annually. Each listing details Zone, Colour, Classification (American Conifer Society), and general expected size at 10 years of age.

### Fir

	Zone	Colour	Class	Size
<b>European Silver Fir</b>				
Abies alba Pendula A green weeping form of the Silver Fir needs staking to develop a leader. All side branches strictly pendulous.	5	Dark Green	Intermediate	150cm
Abies alba Pyramidalis A columnar form. Very pyramidal and tight. Can grow 30cm a year. Nice glossy green needles.	5	Dark Green	Large	150cm
<b>Balsam Fir</b>				
Abies balsamea Eugene's Gold A relatively new form of the balsam. Deep yellow colour year round. Slow growing.	3	Gold	Intermediate	150cm
Abies balsamea Nana An old dwarf form that is usually round. Growth rate 2 inches per year. Extremely hardy. Tolerates acidic soils.	3	Dark green	Dwarf	60cm
Abies balsamea Piccolo The ultimate dwarf Balsam Fir. Only grows ½ inch per year. Small bun.	3	Dark Green	Miniature	40cm
Abies balsamea Tyler's Blue A balsam fir with blue needles otherwise normal growing for the species.	3	Blue	Large	150cm
Abies balsamea Larry's Weeping A unique weeping selection that needs to be staked for height. Can we assume it was found by Larry?	3	Green	Intermediate	150cm
<b>Grecian Fir</b>				
Abies cephalonica Meyer's Dwarf Nice spreading type that will eventually mound.	5	Dark Green	Dwarf	60cm

### Cilician Fir

Abies cilicicia 5b Dark Green Large 150cm  
The species of the Cilician Fir. Must have well drained soils.

Abies cilicicia Spring Grove 5b Dark Green Dwarf 50cm  
A witches broom found in Ohio I believe. Very dense slow growing. Pyramidal. Extremely rare.

### White Fir

Abies concolor 4 Grey Large 175cm  
A large stately specimen with needles ranging from green to blue.

Abies concolor Archer's Dwarf 4 Blue/Grey Dwarf 100cm  
Compact form eventually making a leader. Suitable for the rock garden.

Abies concolor Blue Cloak 4 Powder Blue Large 150cm  
Beautiful weeping form. More less central leader with cascading branches. Once trained.

Abies concolor Candicans 4 Powder Blue Large 175cm  
Probably the bluest form of Silver fir. Very large blue needles. Often grows open form when young.

Abies concolor Commanche 4 Blue/Grey Miniature 50cm  
Very tight globose plant only growing an inch or two per year. Choice plant. Hard to propagate.

Abies concolor Compacta 4 Silver Blue Intermediate 120cm  
A dwarf upright pyramid. Tight growing, large needed.

Abies concolor Conica 4 Green/Blue Intermediate 100cm  
Very dwarf and tight growing. Upright growing.

Abies concolor Easel Point 4 Silver Dwarf 70cm  
Another very tight growing witches broom found in Iowa. Needles slightly longer than other broom types listed.

Abies concolor Gable's Weeping 4 Green Intermediate 120cm  
A semi weeping form. Very large needles. Becomes quite wide.

Abies concolor Glenmore 4 Sky Blue Large 150cm  
Large growing form like the species with exceptionally bright blue needles. Grows about 1 foot a year.

Abies concolor Kinky 4 Grey Intermediate 120cm  
Interesting pyramidal semi dwarf. Has drooping branchlets.

Abies concolor Lavita 4 Grey Dwarf 60cm  
Round witches broom with more vigour than other cultivars. Grows about 2 inches a year.

Abies concolor Masonic 4 Grey Dwarf 40cm  
Bun form, so small and cute. Extremely slow and rare.

Abies concolor Olsen 4 Grey Dwarf 40cm  
Tiny round ball with small needles. Grows about 1/2 inch a year.

Abies concolor Piggelmee 4 Grey Dwarf 60cm  
A real tiny fellow. globe like, only grows 1 inch a year.

Abies concolor Rochester Park 4 Silver Dwarf 50cm  
Another very tight cute plant. Most likely from a witches broom.

Abies concolor St. John's 4 Silver Miniature 50cm  
Really small and slowing growing bun type. Excellent candidate for the small rock garden.

Abies concolor Stanwood 4 Grey Dwarf 50cm  
Nice flat growing broom. Very dense and attractive.

Abies concolor Tubby A thick branching form. Stout and pyramidal. Love it.	4	Grey	Dwarf	120cm
Abies concolor Waukan Yet another very tiny plant. This little fellow takes his time. Less than an inch of growth a year.	4	Grey	Dwarf	40cm
Abies concolor Wintergold Grey green needles in summer followed by soft yellow when it starts getting colder. Interesting but slow growing.	4	Green/Yellow	Intermediate	100cm
<b>Delavay's Fir</b>				
Abies delavayi Horsford Dwarf spreading clone with wide dark green needles and reddish branches.	5	Green	Dwarf	100cm
<b>Ernest Fir</b>				
Abies ernestii A very interesting species and has large flat needles. Needs to be seen to be appreciated.	5	Green	Large	150cm
<b>Farges Fir</b>				
Abies fargesii Large flat needles, dark green on top and white silver underneath. Red bark. Medium grower to 50 feet.	5	Dark Green	Large	150cm+
<b>Japanese Fir</b>				
Abies firma				
Abies firma Halgren A formal form of the Japanese Fir. Grows about 1 foot a year.	5b	Green	Large	150cm
Abies firma Nana Horizontalis Dwarf spreading fir. Quite rare for the species. Very dark green needles.	5b	Green	Dwarf	80cm
<b>Fraser Fir</b>				
Abies fraseri A pyramidal species 60ft and endemic to North America. Good colour and often used in the Christmas tree industry.	5	Green	Large	175cm
Abies fraseri Blue Bonnet Striking blue on this tiny plant. Great rock garden choice.	5	Blue	Dwarf	60cm
Abies fraseri Franklin A very dense and slowly growing pyramid. Great for rock gardens that want a little height.	5	Green	Dwarf	80cm
Abies fraseri Kleins Nest Somewhat spreading but upright growing. Really dense growing.	5	Green	Dwarf	90cm
Abies fraseri Paul's Broom Very small and slow growing plant. Globose.	5	Green	Dwarf	60cm
Abies fraseri Prostrata A more or less spreading dwarf. Will become much wider than high.	5	Dark Green	Dwarf	80cm
Abies fraseri Rawls Pretty blue on a dwarf pyramid. Really nice.	5	Blue	Dwarf	90cm
Abies fraseri Vasti Extremely small, short needled plant. This a rockery plant. Growth rate 2-4cm per year. Very, very rare.	5	Dark Green	Minature	30cm

### Giant Fir

Abies grandis 6 Green Large 150cm  
Tree to 150feet or more. Long shiny flat needles. Needs Protection in our climate.

Abies grandis Aurea 6 Gold Intermediate 100cm  
Bright yellow flush in the spring later turning green. Somewhat slow growing.

### Manchurian Fir

Abies holophylla 4 Dark Green Large 175cm  
The Manchurian Fir can grow up to 100'. Long needled, rare in cultivation. Absolutely beautiful. Very hardy.

### Nikko Fir

Abies homolepsis Umbellata 5 Medium Green Large 175cm  
The Nikko Fir. Becomes a tall tree. Another rare plant in cultivation.

Abies homlepsis Variegata 5 Variegated Large 175cm  
A variegated form of the Nikko Fir. Splashes of cream and yellow throughout the plant.

### Korean Fir

Abies koreana 5 Green Intermediate 150cm  
One of the smallest growing of the firs (30 feet). Its blue cones and relatively small size make this tree one of the best for lighter soils.

Abies koreana Aurea 5 Soft yellow Intermediate 150cm  
One of the prettiest golden firs in cultivation. New growth lime green to soft yellow. Colour is consistent year round. Slow growing. Purple cones make a nice contrast.

Abies koreana Blauer Pfiff 5 Blue Intermediate 150cm  
A nice German selection with good blue needles. Densely pyramidal.

Abies koreana Cis 5 Green Dwarf 60cm  
A little ball of glossy needles. Introduced in 1989. Grows ½ inch a year.

Abies koreana Compact Dwarf 5 Green Dwarf 80cm  
Beautiful spreading type. Does become quite large. Grows 3-4 inches a year.

Abies koreana Gait 5 Green Dwarf 80cm  
A narrow upright from Holland. Slower growing.

Abies koreana Gelbunt 5 Variegated Dwarf 80cm  
A compact form of the species with variegation throughout the plant.

Abies koreana Glauca 5 Silvery-blue Intermediate 150cm  
A very rare version of the Korean Fir. Somewhat globose until a leader develops becoming a pyramidal tree.

Abies koreana Golden Dream (Goldener Traum) 5 Gold Dwarf 80cm  
Beautiful dwarf golden selection. Globose but may form a leader in time.

Abies koreana Green Carpet 5 Light Green Dwarf 100cm  
Grows perfectly round and will not likely pass 60cm in height. A very interesting plant for the garden where it can be appreciated.

Abies koreana Green Spreader Another choice spreading plant that doesn't form a leader.	5	Light Green	Dwarf	100cm
Abies koreana Nanaimo Selection of Korean Fir with a good dense pyramidal form.	5	Green	Intermediate	120cm
Abies koreana Silberlocke Probably the best known selection of Korean Fir. Its twisted needles exposing the white stomates make this plant highly popular. Densely pyramidal over time.	5	White and green	Intermediate	150cm
Abies koreana Silbermavers Another very small bun type with green and white showing.	5	Green	Dwarf	40cm
Abies koreana Silberperl Very small bun form. Excellent rock garden choice.	5	Green	Dwarf	40cm
Abies koreana Silver Show A somewhat faster and more pyramidal version of Silberlocke. Growth rate around 10 to 15cm per year.	5	White and green	Intermediate	150cm
Abies koreana Starker's Dwarf A nice low spreading form with attractive needles.	5	Green	Dwarf	80cm

### Rocky Mountain Fir

Abies lasiocarpa Compacta A rich green colour on a compact pyramidal form. Not very common but deserving in any garden situation.	4	Green	Intermediate	150cm
Abies lasiocarpa Daybreak A dense pyramid and slow growing.	4	Green/Blue	Intermediate	150cm
Abies lasiocarpa Glacial Blue Conical plant with powder blue foliage. New.	4	Powder Blue	Intermediate	150cm
Abies lasiocarpa Glauca Compacta A classic well known version of the Rocky Mountain Fir. Soft Needled and dense growing. Good selection for the larger rock garden.	4	Powder Blue	Intermediate	150cm
Abies lasiocarpa Green Globe A densely globose selection mostly likely from a witches broom. Very slow growing. 5cm per year.	4	Green	Dwarf	80cm
Abies lasiocarpa Mulligans Dwarf Tiny little bun. Only grows ½ inch per year!	4	Green	Dwarf	30cm
Abies lasiocarpa Utah Wow, what a tiny plant this is. Difficult to propagate due to lack of scion wood. Bun form.	4	Grey	Miniature	30cm

### Sicilian Fir

Abies nebrodensis A very rare and protected species in the wild. Grows to 40 feet.	5b	Green	Large	150cm
---	----	-------	-------	-------

### Nordmann Fir

Abies nordmanniana Brandt New plant. Info coming.	5	Green	Dwarf	100cm
Abies nordmanniana Fastigiata A very slowly growing fastigate form of the Nikko Fir. It is extremely rare with only a few specimens in the world.	5	Dark green	Dwarf	100cm
Abies nordmanniana Golden Spreader Its name is not exactly true as it becomes a conical golden tree. Choice tree. Probably best in a semi protected area.	5	Gold	Dwarf	120cm

Abies nordmanniana Tortifolia Compact pyramid with contorted needles showing their silvery underside.	5	Green	Large	120cm
Abies nordmanniana Troutman New plant for us. Seems to stay a real tight compact pyramid. Super dark green needles.	5	Dark Green	Intermediate	120cm

<b>Abies nordmanniana x cephalonica</b> Beautiful hybrid with very glossy needles becomes large and stately.	5	Green	Large	120cm
---	---	-------	-------	-------

#### Algerian Fir

Abies numidica Lawrenceville Dwarf conical tree with smaller spikey needles than the species. Surprisingly hardy. RARE.	6	Green	Dwarf	100cm
Abies numidica Pendula A rare weeping form of the Algerian fir. Needs to be staked for height.	6	Green	Dwarf	100cm

#### Spanish Fir

Abies pinsapo

Abies pinsapo Glauca A blue Spanish Fir. Large growing but I suspect in our climate will stay relatively small. Beautiful plant.	6	Blue	Intermediate	100cm
---	---	------	--------------	-------

#### Noble Fir

Abies procera Relatively slow growing pyramid. Somewhat sensitive to winter wind and sun. Mature at 30 feet.	5	Green	Large	100cm
Abies procera Glauca Prostrata Spreading blue form. Not sure if it is truly stable or if it will make a leader. Very attractive looking.	5	Blue	Intermediate	120cm
Abies procera Sherwoodii A slow growing selection of the noble fir with bright yellow needles especially in the spring when it flushes out. Somewhat tender. But a beautiful tree.	5b	Yellow	Intermediate	120cm

#### Siberian Fir

Abies siberica Grows to 100 feet. Tough, hardy and has a nice aromatic smell.	3	Green	Large	150cm
--	---	-------	-------	-------

<b>Abies x arnoldiana Poulsen</b> Globe like cross that came from the Arnold Arboretum.	5	Green	Dwarf	80cm
--	---	-------	-------	------

<b>Abies x pardei Holden</b> New plant for me. From the Holden Arboretum.	6	Green	Intermediate	100cm
--	---	-------	--------------	-------

#### Western Incense Cedar

Usually quite narrow and aromatic. Native to the west coast. They do not like exposed windy sites and must be placed in moist but well drained soils for best results.

Calocedrus decurrens Barrima Gold What an incredible selection from New Zealand. Rich yellow and gold overtones on a pyramidal form.	6	Gold	Intermediate	150cm
Calocedrus decurrens Compacta The dwarf version of the species but more globose. Interesting texture of the needles. Soft to the touch.	6	Dark Green	Dwarf	120cm
Calocedrus decurrens Maupin Glow	6	Green	Dwarf	60cm

New growth bright yellow changing to dark green.

### Atlas Cedar

#### Blue Atlas Cedar

Cedrus atlantica Glauca 6 Blue Large 120cm  
A majestic specimen with time. Tender for this area but for those who are willing to baby their tree will be richly rewarded. Needs protection from wind and winter sun.

Cedrus atlantica Horstman 6 Powder Blue Intermediate 120cm  
So far so good with this clone. Semi dwarf version, very compact. Probably much easier to take care of for those determined to grow a Blue Atlas Cedar.

Cedrus atlantica Pendula 6 Blue Intermediate 120cm  
The very dramatic weeping form of Blue Atlas Cedar. No two specimens are the same and can be trained to grow into arbors etc.

### Chinese Plum Yew

Cephalotaxus harringtonia Duke Gardens 6 Dark Green Dwarf 100cm  
Spreading form. Needles very long and shiny. Tolerates shade.

Cephalotaxus harringtonia Fastigiata 6 Dark Green Intermediate 120cm  
An incredible vase shaped bush with super dark green Needles. Resistant to deer, rabbits, moles, voles etc.

### Cunninghamia/ China Fir

Cunninghamia koshi Little Leo 6 Green Dwarf 60cm  
A neat little bundle of spiky foliage. Has a bronze cast to it in winter. Needs protection. Great collectors plant.

Cunninghamia lanceolata Coolwyn Compact 6 Green Dwarf 60cm  
A cool spiky plant that grows into a ball. New for me but has come through 2 winters uninjured. Suspect it needs ample protection from winter wind and sun.

### Lawson's Cypress

Chamaecyparis lawsoniana Ellwoodii 6 Bluish Intermediate 120cm  
Pillar like. Green needles with blue overtones. One of the older cultivars.

Chamaecyparis lawsoniana Ellwood's Nymph 6 Bluish Dwarf 60cm  
A very dwarf sport of Ellwoodii. Definitely a candidate for the rock garden. Only grows a couple inches a year.

Chamaecyparis lawsoniana Ivonne 6 Yellow Large 120cm  
A bright yellow columnar form to 20 feet. This selection has won a few horticultural awards.

Chamaecyparis lawsoniana Lycopodoides 6 Green Intermediate 100cm  
Twisted and congested growth distorting the plant. New.

### Alaskan Cedar

Many selections are beautiful and graceful looking. I believe we offer more varieties than most other nurseries. All like moist well drained soils and least a half day of sun.

Chamaecyparis nookatensis 5 Green Large 200cm  
Beautiful species. Very graceful and large growing. Can grow over 150 feet in the wild.

Chamaecyparis nookatensis Aurea (Lutea) 5 Yellow/ Green Large 200cm  
A fast growing form of light yellow cast over green. Subtle but attractive.

Chamaecyparis nootkatensis Aureovariegata	5	Yellow/Green	Large	175cm
Beautiful rare selection of Alaskan Cedar with splashes of yellow throughout. Growth rate about 15-20cm per year. Full and vigorous.				
Chamaecyparis nootkatensis Glauca	5	Green/Glaucous	Large	200cm
A popular variety that grows tightly pyramidal. New growth has a bluish colour before turning a rich dark green with blue undertones.				
Chamaecyparis nootkatensis Glauca Compacta	5	Dark green	Dwarf	100cm
Another very rare form that grows squatly pyramidal to 10 feet. Very hard to find cultivar.				
Chamaecyparis nootkatensis Glauca Pendula	5	Green/Bluish	Large	200cm
Fast growing weeping form that keeps its central leader. Similar to Pendula but needles much finer.				
Chamaecyparis nootkatensis Gracilis	5	Green	Intermediate	100cm
A semi dwarf form. Grows very compact needles are unlike other cultivars. Grow to 20 feet.				
Chamaecyparis nootkatensis Green Arrow	5	Green	Large	200cm
Fast growing form that is very narrow. Nearly all branches hang straight down. Grows to 30 feet.				
Chamaecyparis nootkatensis Jubilee	5	Green	Large	200cm
A narrow weeping form. Fast growing.				
Chamaecyparis nootkatensis Moonshot	5	Green	Large	200cm
May be even more narrow than Van den Akker. A 20 foot tree will be less than a 1 foot wide.				
Chamaecyparis nootkatensis Pendula	5	Green	Large	200cm
A beautiful and very popular form of the Alaskan Cedar. Becomes a focal in any garden.				
Chamaecyparis nootkatensis Pendula Select	5	Green	Large	200cm
This form is much fuller than Pendula. They are often sold as the same plant but they are distinctly different.				
Chamaecyparis nootkatensis Sparkling Arrow	5	Variegated	Large	200cm
Apparently a cream variegated sport of Green Arrow. Looks promising.				
Chamaecyparis nootkatensis Strict Weeping	5	Green	Large	200cm
Another excellent super narrow form. Large specimens are awe inspiring.				
Chamaecyparis nootkatensis Tatra	5	Green	Intermediate	120cm
A form with juvenile foliage. It's very soft and attractive. Extremely rare.				
Chamaecyparis nootkatensis Van den Akker	5	Green	Large	200cm
Unbelievable narrow form. Grows to 30 feet however many plants don't grow any wider than a foot or two. Strictly pendulous. Rare!				
Chamaecyparis nootkatensis Variegata	5	Green/White	Large	175cm
A nice variegated form that is broadly pyramidal. Variegation is spread throughout the entire tree. Slower growing to 20 feet.				
<b>Japanese Hinoki False Cypress</b>				
Chamaecyparis obtusa Aurea Nana	5	Yellow	Dwarf	90cm
Slow growing form resembling Nana Gracilis.				
Chamaecyparis obtusa Arneson's Compact	5	Green	Dwarf	30cm
Very dense plant. Not sure of its growth habits but it is truly dwarf.				
Chamaecyparis obtusa Baldwin Variegated	5	Variegated	Dwarf	100cm
Upright growing with flecks of cream scattered about the plant.				
Chamaecyparis obtusa Brevirmea	4b	Green	Intermediate	120cm
The hardiest Hinoki of them all. Native to the northern				

regions of Japan. Grows like the species.

Chamaecyparis obtusa Compacta An old but lovely form of Hinoki. Dense and irregular growing.	5	Green	Dwarf	120cm
Chamaecyparis obtusa Confuscious A beautiful gold cultivar found in New Zealand. Compact and upright growing. One of my favourites.	5	Yellow	Dwarf	120cm
Chamaecyparis obtusa Coralliformis Fairly fast growing wiry plant. Has an interesting look to it for those who like the unusual.	5	Green	Dwarf	120cm
Chamaecyparis obtusa Crippsii Of the larger growing Hinokis this one is likely the brightest yellow of them all. Can burn in hot dry sites. Grows 10-15cm per year.	5	Bright yellow	Dwarf	150cm
Chamaecyparis obtusa Dainty Doll A slower and my dense growing form of the Gracilis cultivar.	5	Green	Intermediate	120cm
Chamaecyparis obtusa Elf Tiny little fellow. Needs to be in a rock garden. Very slow growing.	5	Green	Miniature	40cm
Chamaecyparis obtusa Erica A mixture of adult and juvenile foliage gives this plant an interesting texture for the landscape.	5	Green	Dwarf	100cm
Chamaecyparis obtusa Fernspray Gold Very bright yellow foliage. Susceptible to burning in sun.	5	Yellow	Dwarf	120cm
Chamaecyparis obtusa Filicoides A fairly fast growing selection with fern like leaves. Can grow as a shrub. Mature at 15 feet.	5	Dark green	Dwarf	150cm
Chamaecyparis obtusa Gimborn's Beauty Fast growing form with blue over tones. Really eye catching. Definitely a favourite in the Hinoki group.	5	Blue/Green	Intermediate	120cm
Chamaecyparis obtusa Gold Drop Small intense yellow coloured plant to 6 feet. Slow growing.	5	Gold	Dwarf	100cm
Chamaecyparis obtusa Gold Fern A soft finely textured plant with bright yellow needles. Dainty looking.	5	Gold	Dwarf	60cm
Chamaecyparis obtusa Golden Nymph Another compact gold pyramid plant to 6 feet.	5	Gold	Dwarf	100cm
Chamaecyparis obtusa Golden Sprite Tiny flat bun. Everything is miniature about it.	5	Gold	Miniature	60cm
Chamaecyparis obtusa Golden Whorl Leaves are long and contorted. Has golden streaks throughout the fasciations. Very interesting new form.	5	Gold/Green	Dwarf	100cm
Chamaecyparis obtusa Gracilis Can be a fairly large tree over of time. Horizontal branching.	5	Dark green	Intermediate	175cm
Chamaecyparis obtusa Gracilis Aurea Same as above but a gold version.	5	Gold	Intermediate	175cm
Chamaecyparis obtusa Graciosa Broadly conical with interesting netted foliage. Grows 10cm per year.	5	Medium green	Dwarf	100cm
Chamaecyparis obtusa Heavy Texture Fast growing form with horizontal branches and interesting needle structure.	5	Green	Intermediate	120cm
Chamaecyparis obtusa Kerdalo A newer upright form not unlike Crippsii but has orange colour in the winter.	5	Gold	Dwarf	100cm

Chamaecyparis obtusa Kosteri A dwarf conical plant to 4 feet over time. Quite slow growing.	5	Green	Dwarf	100cm
Chamaecyparis obtusa Kosteri Fast Form Larger growing form than the above listed. To 15 feet.	5	Green	Intermediate	120cm
Chamaecyparis obtusa Lacy Nearly string like drooping foliage on this Hinoki. Looks like its melting.	5	Green	Dwarf	100cm
Chamaecyparis obtusa Lemon Twist A twisted branched selection with yellow and green on the same branch. Develops cockscombs.	5	Yellow/Green	Dwarf	100cm
Chamaecyparis obtusa Limerick Nice upright, green infused with yellow. Glows at certain times of the day.	5	Yellow/Green	Dwarf	100cm
Chamaecyparis obtusa Little Anne Dwarf columnar form. Unusual for the species. Nice.	5	Green	Dwarf	80cm
Chamaecyparis obtusa Lutea Nana A yellow dwarf form that deepens to a gold in the winter.	5	Yellow	Dwarf	80cm
Chamaecyparis obtusa Lutea Nova Open growing form with bright yellow foliage. Should be in partial shade for best results.	5	Bright Yellow	Intermediate	100cm
Chamaecyparis obtusa Lycopodioides Very thick leaved shrub type. Branches are often faciated.	5	Dark green	Dwarf	100cm
Chamaecyparis obtusa Lycopodioides Aurea Shrub like. Same as above but yellow. Rare plant.	5	Yellow	Dwarf	100cm
Chamaecyparis obtusa Mariesii A pretty white variegation gives a marbled look to it.	5b	Variegated	Dwarf	80cm
Chamaecyparis obtusa Nana The true Nana. It is incredibly slow growing. Maybe 1 inch a year.	5	Green	Miniature	40cm
Chamaecyparis obtusa Nana Gracilis The most common and popular Hinoki. Reliably dwarf.	5	Dark green	Dwarf	100cm
Chamaecyparis obtusa Nana Lutea Round little plant of bright yellow foliage. Somewhat tender with sun and wind.	5b	Yellow	Dwarf	80cm
Chamaecyparis obtusa Prostrata An open form with pendulous branches. Sometimes staked for an interesting effect.	5	Dark Green	Dwarf	100cm
Chamaecyparis obtusa Pygmae Another very, very slow type. Rock garden plant.	5	Green	Dwarf	40cm
Chamaecyparis obtusa Pygmae Aurescens Grows much faster than Pygmae and turns a bronze colour in the winter.	5	Green	Dwarf	80cm
Chamaecyparis obtusa Rashimba Dwarf form with twisted and contorted branches. Looks bizarre.	5	Green	Dwarf	100cm
Chamaecyparis obtusa Reis Dwarf Strong upright with short lateral branching. Very unique look to it.	5	Green	Dwarf	80cm
Chamaecyparis obtusa Rigid Dwarf Conical formal looking form. Really beautiful as it gets bigger. To 15 feet.	5	Green	Dwarf	100cm
Chamaecyparis obtusa Saffron Spray	5b	Variegated	Dwarf	60cm

Mostly juvenile foliage with gold flecks throughout. Needs protection.

Chamaecyparis obtusa Snowkist Globose type with white flecks throughout the plant.	5	Variegated	Dwarf	80cm
Chamaecyparis obtusa Special Variegated Fast growing form. Green with yellow or cream frosting on the tops to the needles. Truly unique and beautiful.	5	Yellow/ Green	Intermediate	120cm
Chamaecyparis obtusa Split Rock Interesting juvenile foliaged shrub with blue and green mixed throughout. Mature at 6 feet.	5	Blue/Green	Dwarf	100cm
Chamaecyparis obtusa Stoneham Very dense and congested growing. Globe form. Super slow growing.	5	Green	Miniature	40cm
Chamaecyparis obtusa Tonia Dwarf upright with white tips.	5	Green/White	Dwarf	80cm
Chamaecyparis obtusa Torulosa Thick leaves that often have fasciations. Grows about 5 to 10 cm per year. Usually in the form of a shrub.	5	Dark green	Dwarf	100cm
Chamaecyparis obtusa Tsatsumi Another contorted form but seem to grow as high as other forms.	5	Green	Dwarf	100cm
Chamaecyparis obtusa Well's Special Upright to 25 feet. Similar to Gracilis but more compact. Rare!	5	Medium green	Intermediate	150cm

### Sawara Cypress

Chamaecyparis pisifera Baby Blue Ice Round ball of intense blue and silver. Really striking. New.	5	Blue/Silver	Dwarf	80cm
Chamaecyparis pisifera Boulevard A soft puffy broad upright. Good blue colour with white stomates. Needs some winter protection from wind. Easy to shape.	5	Blue/Silver	Dwarf	125cm
Chamaecyparis pisifera Compressa Light green form that grows into a ball.	5	Light Green	Dwarf	80cm
Chamaecyparis pisifera Curly Tops New! A sport from Boulevard with twisted foliage. Grows in a round ball. Great dwarf for small gardens.	5	Blue/Silver	Dwarf	100cm
Chamaecyparis pisifera Devon Cream Like Boulevard but flushes out in a cream colour before turning blue.	5	Blue	Dwarf	100cm
Chamaecyparis pisifera Dwarf Blue Dense round ball of fine blue foliage. New to the trade. Great accent plant.	5	Blue	Dwarf	80cm
Chamaecyparis pisifera Filifera Fine lacy foliage on a squatly pyramidal bush to 10 feet. Quite hardy. Looks nice around water.	5	Green	Intermediate	125cm
Chamaecyparis pisifera Filifera Aurea Golden lacy foliage on a squatly pyramidal bush to 10 feet. Quite hardy. Doesn't seem to burn in sun or with winter winds.	5	Gold	Intermediate	125cm
Chamaecyparis pisifera filifera Lemon Thread Another gold type filifera of gold foliage. Attractive plant that can be used in variety of situations.	5	Gold	Dwarf	80cm
Chamaecyparis pisifera filifera Gold Mops Very popular selection of lacy gold foliage year round.	5	Gold	Dwarf	80cm
Chamaecyparis pisifera filifera Gold Spangle A conical upright to 12 feet. Leaves are the brightest yellow. Doesn't burn at a young age. Very hardy.	5	Gold	Intermediate	125cm

Chamaecyparis pisifera filifera Pin Cushion Tiny bun form. Green colour slow growing.	5	Green	Miniature	40cm
Chamaecyparis pisifera filifera Sungold String like gold foliage. Looks like a mop. Said to be sunburn resistant.	5	Gold	Dwarf	80cm
Chamaecyparis pisifera filifera Variegata A nice filifera with gold variegation throughout. Doesn't seem to revert.	5	Gold/Green	Dwarf	80cm
Chamaecyparis pisifera Plumosa Compressa Ultra dwarf. Dense round spreading type with dark green foliage. Excellent rock garden or border plant.	5	Green	Dwarf	60cm
Chamaecyparis pisifera Plumosa Dumosa An old rare cultivar from Europe. Irregular globe to 8 feet by 8 feet. Tolerates shade well.	5	Green	Dwarf	100cm
Chamaecyparis pisifera Plumosa Flavescens A broad squatty conical plant. New growth yellow becoming green as foliage matures. Mature at 6 feet.	5	Gold/Green	Dwarf	100cm
Chamaecyparis pisifera Squarrosa Intermedia A wiry round ball with dainty juvenile foliage. New growth white later green. Prefers half a day of sun in our climate.	5	Green/White	Dwarf	100cm
Chamaecyparis pisifera filifera Sunproof Yellow lacy foliage that is apparently more resistant to sun burn.	5	Yellow	Dwarf	80cm
<b>Eastern White Cypress/Cedar</b>				
Chamaecyparis thyoides Aquavelva Nice coloured form with an eye catching. Open and wispy.	5	Blue/Green	Dwarf	100cm
Chamaecyparis thyoides Meth's Dwarf Nice little globe and a great winter colour of plum and green. Looks like some sort of ice cream.	5	Green	Dwarf	80cm
Chamaecyparis thyoides Okekenokee Compact New plant info coming.	5	Green	Dwarf	120cm
Chamaecyparis thyoides Raulston Form From South Carolina. More info coming.	5	Green	Intermediate	120cm
Chamaecyparis thyoides Shiva A pretty dwarf form.	5	Green	Dwarf	100cm
<b>Japanese Incense Cedar or Japanese Cryptomeria</b>				
Cryptomeria japonica Bandai Sugi Neat little irregular globe.	5b	Green	Dwarf	100cm
Cryptomeria japonica Barabit's Gold A gold form from Hungary said to be hardier.	5b	Gold	Intermediate	120cm
Cryptomeria japonica Black Dragon Gorgeous dark green pyramid. Super dense growing.	5b	Green	Intermediate	100cm
Cryptomeria japonica Cristata Cool fascinated growth always sparks a conversation.	5b	Green	Intermediate	100cm
Cryptomeria japonica Elegans Juvenile foliage on this form. Turns brick red in the fall.	6	Lite Green	Intermediate	100cm
Cryptomeria japonica Falcata A twisted contorted dwarf. Very unusual.	5b	Green	Dwarf	100cm
Cryptomeria japonica Knaptonensis New growth white before turning green. Tender plant.	5b	Green/White	Dwarf	100cm

Cryptomeria japonica Koshi New. Info coming.	5b	Green	Dwarf	100cm
Cryptomeria japonica Pom Pom Interesting globe form. New	5b	Green	Dwarf	80cm
Cryptomeria japonica Pyramidalis Formal pyramidal form with slender branches.	5b	Green	Large	120cm
Cryptomeria japonica Rasen Another cool plant with contorted growth. Bizarre.	5b	Green	Intermediate	100cm
Cryptomeria japonica Sekken Sugi Bright yellow year round. Otherwise grows like the species. Just stunning.	6	Yellow	Intermediate	100cm
Cryptomeria japonica Spiralis Branches and needles are twisted. Just cool.	5b	Green	Intermediate	100cm
Cryptomeria japonica Tansu sport Super dwarf and tight growing form. Great rock garden plant.	5b	Green	Miniature	60cm
Cryptomeria japonica Vilmoriana A dwarf round ball that can mound. Dark green leaves turning a plum to red in winter. Striking plant. Doesn't like winter sun. Cover with burlap in cold climates.	5b	Green	Dwarf	80cm

### Arizona Cypress

Cupressus glabra Blue Ice Another absolutely beautiful form. A most interesting texture. Loosly pyramidal.	5b	Blue	Large	150cm
Cupressus glabra var. Montana Blue Column Tight columnar form. Supposed to be very hardy. New. Mature at 30 feet.	5b	Blue	Large	150cm

### Leyland Cypress

Cupressus leylandii David's Blue Fast growing blue form. Pyramidal form.	6	Blue	Large	150cm
Cupressus leylandii Castlewella Gold Tall columnar form of bright yellow but deeper in winter.	6	Gold	Large	150cm
Cupressus leylandii Gold Rider I don't know of a brighter yellow conifer. Columnar in form. Bright yellow year round. You can cut a branch off of it and use it as a flash light. Should be sited in a protective area.	6	Gold	Large	150cm
Cupressus leylandii Hyde Hall Small tight conical form. Green colour and slowing growing.	6	Green	Dwarf	80cm
Cupressus leylandii Picturesque New plant. Info coming.	6			
Cupressus leylandii Silver Dust A neat cream variegated form from the U.S. Grows columnar like. Somewhat tender and should be kept out of the winter wind and sun.	6	Variegated	Large	120cm

### Juniper

#### Chinese Juniper

Juniperus chinensis plumosa Aurea Slow growing vase shaped shrub to 10 feet. Turns distinctly orange when the cold weather sets in. Excellent accent plant.	3	Gold/Yellow	Dwarf	100cm
Juniperus chinensis Pfitzeriana Glauca Fast growing spreader with blue foliage. Popular garden plant.	4	Blue	Large	150cm

Juniperus chinensis Gold Coast Low growing spreader with bright golden foliage year round.	4	Gold	Intermediate	120cm
Juniperus chinensis Lime Glow One of the nicest spreading dwarf junipers to come along. Nice mix of chartreuse and yellow in the winter. Highly recommended.	3	Yellow	Dwarf	100cm
Juniperus chinensis Mac's Golden The original plant was struck by lightning which caused the mutation. Beautiful plant. Needs full sun and room to grow. Mature at 25 feet.	3	Yellow	Intermediate	120cm
Juniperus chinensis Rose Arbor A small upright tree green in summer but turns a beautiful blush/plumcolour in winter. Rare winter colour in any conifer.	3	Green	Intermediate	175cm
Juniperus chinensis Shimpaku Old slow growing form. Used for Bonsai. Spreading.	3	Green	Dwarf	120cm
Juniperus chinensis Shipaku Gold Form Same as above just little slower growing.	3	Gold	Dwarf	100cm
Juniperus chinensis Shoemith New. Info coming.	3			
Juniperus chinensis Variegated Kaizuka Splashes of cream throughout this interesting form of the Hollywood juniper. Fast growing.	3	Variegated	Intermediata	150cm

### Common Juniper

Juniperus communis Alpine Carpet A flat ground hugging variety. Slower growing. Nice plant.	3	Green	Dwarf	80cm
Juniperus communis Arnoldiana Beautiful selection from the Arnold Arboretum. Rock garden type plant.	3	Green	Dwarf	100cm
Juniperus communis Compressa A super tight columnar form to 5 feet. Needs protection from winter sun.	5	Green	Dwarf	100cm
Juniperus communis Depressa Aurea Flat spreading ground cover. New growth lemon yellow before changing to light green. Bronze cast in winter.	3	Gold	Dwarf	100cm
Juniperus communis Gold Cone Stunning selection from Australia. New growth brilliant yellow. Keeps its colour year round. All round amazing plant. Tight growing.	4	Gold	Dwarf	100cm
Juniperus communis Green Carpet Another ground hugging plant that is a bit faster growing.	3	Green	Dwarf	100cm
Juniperus communis Hibernica Tight columnar plant growing to 20 feet. Very hardy. Slower Growing than Suecica.	3	Green	Intermediate	150cm
Juniperus communis Marchland New growth bright yellow later changing to green. Great plant for dry sandy locations.	3	Gold/Green	Intermediate	120cm
Juniperus communis Oblonga Pendula A weeping form to 20 feet found in Germany. Picturesque.	3	Green	Intermediate	120cm
Juniperus communis Pencil Point Tight and compact columnar type. Extremely hardy.	3	Green/Silver	Dwarf	120cm
Juniperus communis Repanda Beautiful spreading juniper. More or less creeps. Very hardy. Great ground cover. No evidence of blight.	3	Green/Silver	Dwarf	120cm
Juniperus communis Silver Streamers A weeping variety of uncommon silver, blue and green.	3	Green/Silver	Dwarf	100cm

Fast growing. Just beautiful.

Juniperus communis Suecica 3 Green/Silver Intermediate 150cm  
A columnar cone to 20 feet. Interesting texture. Makes a good hedge.

Juniperus communis Suecica Nana 3 Green Dwarf 100cm  
Super slow growing column. Grows about 2 inches a year.

#### Shore Juniper

Juniperus conferta Blue Pacific 6 Blue Dwarf 100cm  
Pretty blue colour for the ground hugging plant.

Juniperus conferta Silver Mist 6 Silver/Green Dwarf 100cm  
Striking silver colour. Gleams at certain times of the day.

#### Japanese Garden Juniper

Juniperus procumbens Nana 4 Green Dwarf 100cm  
Dwarf spreading juniper. Good green colour and dense growing.

#### Creeping Juniper

Juniperus horizontalis Andorra Variegated 3 Variegated Dwarf 100cm  
Interesting gold flecks are scattered about its foliage.

Juniperus horizontalis Bar Harbour 3 Blue Dwarf 100cm  
Another nice blue selection out there.

Juniperus horizontalis Blue Rug (Wiltonii) 3 Blue Dwarf 100cm  
A flat spreading type with good blue coloration. Great ground cover.

Juniperus horizontalis Icee Blue 3 Blue Dwarf 100cm  
An extremely blue sport of Wiltonii. Very low growing.

Juniperus horizontalis Glauca 3 Blue Dwarf 100cm  
Flat spreading type of Creeping Juniper with a nice blue colour.

Juniperus horizontalis Mother Lode 3 Yellow Dwarf 100cm  
A golden sport of Blue Rug. Bright yellow. Wow!

Juniperus horizontalis Pancake 3 Blue/Green Dwarf 80cm  
May just be the flattest growing of any Creeping Junipers.

Juniperus horizontalis Prince of Wales 3 Blue Dwarf 120cm  
A more vigorous selection of creeping juniper.

Juniperus horizontalis Youngstown 3 Green/Blue Dwarf 100cm  
Another creeping form known for its plum red colour in winter.

#### Savin Juniper

Juniperus sabina Calgary Carpet 3 Green Dwarf 100cm  
A low growing spreader with soft green foliage. Branches overlap.

Juniperus sabina Variegata 3 Variegated Dwarf 100cm  
Not unlike the species but heavy white variegation throughout.

#### Single Seed Juniper

Juniperus squamata Blue Alps 5 Blue Intermediate 120cm  
Pretty pyramid of steel blue colour. Interesting texture sets it apart from other blue uprights.

Juniperus squamata Blue Carpet 5 Blue Dwarf 120cm  
A low growing spreader with light powder blue foliage. Strong growing.

Juniperus squamata Blue Star Steel blue juniper that mounds. Slow growing.	5	Blue	Dwarf	100cm
Juniperus squamata Chinese Silver Beautiful semi weeping tree. Much sought after. Still rare in North America.	5	Silver		Intermediate 120cm
Juniperus squamata Holger New growth creamy yellow later turning blue on this spreading type. Very nice contrast in the garden.	5	Yellow/Blue		Intermediate 120cm
Juniperus squamata Loderi An interesting mutation that is green and grows into a perfect Pyramid.	5	Green	Intermediate	120cm
Juniperus squamata Meyeri Bush like form to 8 feet. Foliage steel blue.	5	Blue		Intermediate 120cm

### Rocky Mountain Juniper

Juniperus scopulorum Tolleson's Blue Weeper A very pendulous form with a blue cast to it. Striking specimen.	4		Intermediate	175cm
Juniperus scopulorum Wichita Blue Fast growing form. Needs full sun or it will open up and look sparse. Very popular.	3	Blue		Intermediate 200cm

### Eastern Red Juniper

Juniperus virginiana Blue Arrow Another very popular variety. Very upright and tight growing.	3	Blue		Intermediate 200cm
Juniperus virginiana Canaerti Very picturesque form. Often spirals upwards as does its side branches.	3	Green	Large	200cm
Juniperus virginiana Grey Owl A strong growing shrub of lacy silvery grey foliage. Mature at 15 feet.	3	Silver		Intermediate 120cm
Juniperus virginiana Reptans Weeping form of the Eastern Red Juniper. Extremely rare.	3	Green		Intermediate 120cm
Juniperus virginiana (Road Runner) Introduced by Whistling Gardens. A completely prostrate growing plant. Strong grower. Original plant never exceeded 20cm in height. Salt tolerant.	3	Green	Dwarf	120cm
Juniperus x media Daub's Frosted A flat spreading ground cover 6 inches height. Needles bright yellow with hues of blue and green on juvenile foliage. Outstanding plant.	4	Gold/Green	Dwarf	100cm

### European Larch

Larix decidua Cherry Valley A dwarf form of the European Larch.	2	Green		Intermediate 100cm
Larix decidua Craftsbury Flats Dense upright tree. Plant has almost aqua in the colour of its eaves.	2	Green		Intermediate 175cm
Larix decidua Gee Interesting semi weeping form.	2	Green		Intermediate 200cm
Larix decidua Horstmans Reurved An upright and contorted form of the European Larch.	2	Green	Large	200cm
Larix decidua Haverbeck Small dwarf globe of European origin.	2	Green	Dwarf	100cm
Larix decidua Himmel Another dwarf witches broom with bright yellow branches.	2	Green	Dwarf	100cm

Larix decidua Pendula A popular weeping variety that must be staked for height. Bright green leaves in summer with a nice golden fall colour.	2	Green	Intermediate	200cm
Larix decidua Pulli A beautiful strict weeping plant from Europe. Looks just like a caragana with the thorns or suckers.	2	Green	Dwarf	120cm
Larix decidua Saybrook Sleeper Starts off slow and globose but picks up speed with age.	2	Green	Intermediate	120cm
Larix decidua Steuben New dwarf form.	4	Green	Dwarf	100cm
Larix decidua Susie's Duzie Named after the wonderful Susan Eyre of Foxwillow Pines.	2	Green	Dwarf	100cm
<b>Hybrid European Larch</b>				
Larix x eurolepis Varied Directions Large growing spreading shrub. Branches weep over time. Very interesting plant. Fall colour is yellow.	4	Green	Intermediate	200cm
<b>Japanese Larch</b>				
Larix kaempferi Blue Rabbit Slower growing form with nice blue needles. Very pretty.	4	Blue	Intermediate	120cm
Larix kaempferi Blue Sparkler Another pretty blue selection. Pyramidal.	4	Blue	Intermediate	120cm
Larix kaempferi Diana A contorted Japanese larch. All branches including the trunk are contorted. If not staked, becomes a very artistic plant.	4	Green	Large	250cm
Larix kaempferi Dwarf Blue A nice spreading larch with new growth blue. Bright reddish stems also stand out on this plant. Grows about 5-10cm per year.	4	Blue/Green	Dwarf	100cm
Larix kaempferi Jacobsens Pyramid Dense conical form.	4	Green	Large	150cm
Larix kaempferi Paper Lanterns A relatively new form found by Don Howse. Semi contorted.	4	Green	Large	150cm
Larix kaempferi Little Boogie A dwarf version of Diana. Very contorted branching. Probably a better choice when space is limited.	4	Green	Dwarf	60cm
Larix kaempferi Stiff Weeper Somewhat of an oxymoron but still great plants. Often grows contorted.	4	Green	Intermediate	200cm
Larix kaempferi Varley Dense globe dwarf form.	4	Green	Dwarf	80cm
<b>American Larch</b>				
Larix laricina Nash Pendula	4	Green	Large	175cm
<b>Siberian Larch</b>				
Larix siberica Lanark Nice globe witches broom found by Randy Dykstra in Illinois.	3	Green	Intermediate	100cm
Larix siberica Oasis Fast growing form. Very narrow growing and hardy. Developed in Saskatchewan.	3	Green	Large	200cm
<b>Dawn Redwood</b>				
Metasequoia glyptostroboides A beautiful stately tree that can handle lots of moisture.	5	Green	Large	250cm

Nice red bark with age. Only discovered in 1941.

Metasequoia glyptostroboides All Bronze A new variety with very interesting leaf colour otherwise normal growing.	5	Bronze	Large	175cm
Metasequoia glyptostroboides Emerald Feathers Nice light green coloured selection from England.	5	Green	Large	175cm
Metasequoia glyptostroboides Golden Dawn Brand new! Soft buttery yellow growth on a slow growing tree.	5	Yellow	Intermediate	175cm
Metasequoia glyptostroboides Gold Rush New. A gold Dawn Redwood. Keeps its beautiful yellow all season long. Slower growing than the species. Still uncommon in the trade.	5	Yellow	Intermediate	175cm
Metasequoia glyptostroboides Miss Grace Finally a weeping form! Just beautiful and graceful.	5	Green	Intermediate	120cm
Metasequoia glyptostroboides Jack Frost New growth milky white later changing to green. Fast growing.	5	Variegated	Large	200cm
Metasequoia glyptostroboides Little Giant Very dense and conical growing. Not as fast as the species.	5	Green	Intermediate	150cm
Metasequoia glyptostroboides Mattei's Broom A new witches broom selection. Very rare in this species. Great collectors plant.	5	Green	Dwarf	100cm
Metasequoia glyptostroboides Shaw New form from the Shaw Arboretum.	5	Green	Large	250cm
Metasequoia glyptostroboides Sheridan Spire A large tight pyramidal form. Very fast growing.	5	Green	Large	250cm
Metasequoia glyptostroboides Silhouette New variegated form from Holland. Just released.	5	Variegated	Large	250cm
Metasequoia glyptostroboides Waasland Pyramidal form that is fast and straight growing.	5	Green	Large	250cm
Metasequoia glyptostroboides White Spot Interesting new clone with white new growth and spotty variegation.	5	Variegated	Large	250cm
Metasequoia neopangea Possibly a subspecies of the Dawn Redwood. Has larger leaves and cones.	5	Green	Large	250cm

### Russian False Cypress/Cedar

Microbiota decussata Super hardy spreading type like a juniper with Thuja foliage. Nice plum colour in winter. Grows 6 inches a year. Tolerates shade. No blight.	2	Green	Dwarf	100cm
Microbiota decussata Gold Spot Same as the species with gold flecks throughout. Quite attractive.	2	Variegated	Dwarf	100cm
Microbiota decussata Hexenbesen A very cool mutation. This broom grows pyramidal.	2	Green	Dwarf	80cm

### Spruce

#### Norway Spruce

Picea abies Very fast growing spruce most often used as windbreaks nowadays. This species has spawned hundreds of new cultivars better suited to today's smaller gardens.	3	Green	Large	200cm
--	---	-------	-------	-------

Picea abies Aarburg	3	Green	Intermediate	200cm
A very fast growing Norway. Maintains a leader with all side branches hanging straight down.				
Picea abies Acrocona	3	Green	Intermediate	150cm
Usually grows in a mound or shrub. Every spring bright red cones form on the end of most branches.				
Picea abies Arnold's Dwarf	3	Green	Dwarf	100cm
Nice little pyramid. Very tight. Never needs pruning. From the Arnold Arboretum. Grows about 10cm a year.				
Picea abies Argenteospicata	3	Gold/Green	Large	120cm
Bright sulphur yellow flush in spring that deepens to a dark green by mid summer. Slower growing than Aurea.				
Picea abies Asselyn Compact	3	Green	Intermediate	120cm
Another compact upright selection. Very similar to Ohlendorffii but final height is shorter.				
Picea abies Aurea	4	Gold/Green	Large	250cm
A large growing upright. Its spring colour is amazing yellow later turning green with some yellow frosting the top of the needles.				
Picea abies Aurea Jacobsen	4	Gold Green	Large	150cm
Fast growing form with new growth yellow later turning green. A yellow frosting usually stays on the needles when planted in full sun.				
Picea abies Aurea Magnifica	4	Gold	Large	120cm
A year gold norway spruce. Blinding yellow in spring. Slow to establish and can burn in full sun when young.				
Picea abies Barger Broom	3	Green	Dwarf	120cm
Dwarf globe witches broom found by Bill Barger in Ohio. Good tight growth.				
Picea abies Berry Gardens Fast	3	Green	Intermediate	120cm
Somewhat columnar variety with congested growth. Interesting plant. Can grow 30cm a year.				
Picea abies Berry Gardens Slow	3	Green	Dwarf	100cm
Essentially the same plant as above but slower growing often globose.				
Picea abies Brabant	3	Green	Dwarf	80cm
New plant for me. Info coming.				
Picea abies Capitata	3	Green	Dwarf	80cm
A very old European cone. Globose for many then often makes a leader. Quite rare now.				
Picea abies Clanbrassiliana	3	Green	Dwarf	120cm
Upright, broad conical pyramid. One of the first Norway varieties introduced in the 1700's. The original is still alive in Ireland. 4 inches a year.				
Picea abies Clanbrassiliana Stricta	3	Green	Dwarf	100cm
An more upright pyramidal form of the preceding entry.				
Picea abies Cleveland Road	3	Green	Dwarf	100cm
A dense forming upright witches broom found in Iowa I believe.				
Picea abies Cobra	3	Green	Large	175cm
A slightly different take on the Cranston's Snake spruce. Rarely makes side branches. You either love it or hate it.				
Picea abies Cranstonii	3	Green	Large	200cm
Fast growing snake like tree. Tends to only develop terminal branches. Very dramatic looking.				
Picea abies Cruenta	3	Red/Green	Large	175cm
Deep burgundy growth in spring later changing to green. This bizarre colouring is very rare for conifers.				

Picea abies Cupressina A nice narrow columnar selection. Grows to 30cm but only 4 feet wide. Great plant for areas with little room.	3	Green	Large	200cm
Picea abies Cy's Wonder Very dense globose plant. Often with tufted branches.	3	Green	Dwarf	80cm
Picea abies Diffusa Old cultivar eventually becoming swatly pyramidal. Grows about 10cm a year.	3	Green	Dwarf	100cm
Picea abies Dubois A very slow growing plant. Round ball needs to be in a rock garden or trough garden. Hard to propagate.	3	Green	Miniature	50cm
Picea abies Echiniformis The Hedge Hog spruce. Grows into a round spiny ball. Quite rare now.	3	Green	Dwarf	80cm
Picea abies Elegantissima A fairly narrow growing pyramid. Spring growth is very interesting with its bright yellow in spring fading to a whitish green. Good for contrast.	3	Yellow/Green	Intermediate	175cm
Picea abies Farnsburg A dwarf weeping selection only growing 10cm a year. A better solution where room is limited.	3	Green	Dwarf	100cm
Picea abies Filicoides The needles on this Norway are extremely short and dark green. Very interesting texture.	3	Green	Intermediate	100cm
Picea abies Flat Top Low spreading variety. Suitable as a ground cover.	3	Green	Dwarf	80cm
Picea abies Formanek A dwarf spreading or weeping tree if staked. Slow growing Interesting Branching habit.	3	Green	Dwarf	100cm
Picea abies Frohburg An intermediate weeping tree if staked the first couple of years. A seedling of Inversa.	3	Green	Dwarf	100cm
Picea abies Globosa A rather rare selection on the Norway spruce. Very dense. Less than 10cm per year.	3	Green	Dwarf	100cm
Picea abies Gold Drift The first weeping golden weeping Norway. New growth Yellow later green. Found by Robert Fincham as a sport of Inversa.	3	Gold/Green	Intermediate	120cm
Picea abies Gold Seedling 2000 Slow growing variety found in seedling batch. Gold year round. RARE!	4	Gold	Large	100cm
Picea abies Hillside Upright A dwarf upright with extremely dark green needles and contorted branches. Unusual growth habit.	3	Green	Intermediate	120cm
Picea abies Hornibrookiana Large shrub type often forming many leaders. Never seen it he trade.	3	Green	Intermediate	120cm
Picea abies Humilis A dwarf eventually conical plant. Some years may have accelerated growth.	3	Green	Dwarf	100cm
Picea abies Humphrey's Gem Cute dense ball of needles. Excellent rock garden plant.	3	Green	Dwarf	80cm
Picea abies Inversa Fast growing tree with a straight leader and all side branches pendulous. Good plant for areas that have the room.	3	Green	Intermediate	175cm
Picea abies Kellerman's Blue	3	Blue/Green	Dwarf	60cm

A flat round spreading plant. Leaves are a nice turquoise colour. Will Always be limited due to its slow growth. Less than 10cm a year.

Picea abies Little Gem One of the most common dwarf Norway varieties. Round ball and dense growing. Was a witches broom found on Nidiformis.	3	Green	Dwarf	80cm
Picea abies Little Joe A dense conical form. Reminds me of an Alberta Spruce but doesn't suffer wind burn.	3	Green	Dwarf	120cm
Picea abies Krnak Super slow growing form from eastern Europe. Only grows 1 inch a year. Becomes conical over time.	3	Green	Miniature	60cm
Picea abies Maxwellii An old broadly conical form. Very rare now.	3	Green	Dwarf	100cm
Picea abies Merki A globose dwarf. Will be 4 x4 feet in about 12-15years.	3	Green	Dwarf	100cm
Picea abies Microsperma Shrub like smaller dark green needles. Not a true stand out.	3	Green	Dwarf	100cm
Picea abies Mucronata Nice rounded dwarf that has become popular. Somewhat Sharp needled but can be used in a variety of situations.	3	Green	Dwarf	80cm
Picea abies Nana An almost lost cultivar. Very, very slow growing. 30 year old specimens reach 4 feet.	3	Green	Dwarf	100cm
Picea abies Nidiformis Very popular selection called the Bird's Nest Spruce. If grafted grows more upright than propagated with cuttings.	3	Green	Dwarf	120cm
Picea abies Ohlendorffi A conical upright well known in the trade. Can grow a foot a year once established.	3	Green	Intermediate	120cm
Picea abies Parsonii A fuzzy round ball. Only grows 5cm a year.	3	Green	Dwarf	80cm
Picea abies Pine Glen Another witches broom from Nidiformis. Even slower growing than Little Gem.	3	Green	Miniature	50cm
Picea abies Pendula A creeping selection if not staked. Makes an excellent ground cover.	3	Green	Intermediate	120cm
Picea abies Pendula Major A selection that seems to hug the ground even more so than Pendula. Slower growing than Pendula too.	3	Green	Intermediate	100cm
Picea abies Pseudomaxwelli A globose form. Needles and branches look like Maxwell's Norway but this stays a globes. Grows 3-4 inches a year.	3	Green	Dwarf	80cm
Picea abies Repens Gold A sport from Repens. Grows like its parent. Can burn in full sun.	3	Gold	Dwarf	80cm
Picea abies Perry's Gold Stunning gold growth on conical dwarf before turning green. Extremely rare. Limited.	4	Gold/Green	Dwarf	100cm
Picea abies Procumbens Grows like Nidiformis only a bit large and faster growing.	3	Green	Dwarf	100cm
Picea abies Pygmae A very old slow growing selection. Some years have erratic growth.	3	Green	Miniature	80cm
Picea abies Pygmae Broom A witches broom found on Pygmae. Grows 1/2in at the per	3	Green	Miniature	40cm

year. Possibly my slowest growing variety.

Picea abies Pyramidata Slow growing, tight pyramidal plant. Grows about 10cm a year.	3	Green	Dwarf	100cm
Picea abies Regina Pendula Dwarf weeping selection that comes from Vancouver I believe.	3	Green	Dwarf	100cm
Picea abies Remontii Slower growing conical up to 15cm a year. Old cultivar.	3	Green	Dwarf	100cm
Picea abies Rick's White Top A nifty new plant in the Norway department with new growth creamy white.	3	Green/White	Intermediate	120cm
Picea abies Skyhigh One of the smallest Norway varieties. Grow about ½ inch a year. Choice trough or rock garden plant.	3	Green	Miniature	40cm
Picea abies Spicata Rubra The Dragon's Fire Spruce. An upright tree with stunning scarlet Spring colour before changing to green. Very unusual for any conifer.	3	Red/Green	Large	120cm
Picea abies Tabulaformis Mounding form of this very old selection. Can get to 8 feet.	3	Green	Dwarf	100cm
Picea abies Tompa Super slow growing round ball with interesting needles. Very rare.	3	Green	Miniature	50cm
Picea abies Vasser's Broom A strong spreading shrub. Dark green needles.	3	Green	Dwarf	120cm
Picea abies Vilminalis Large growing, with branchlets on side branches very pendulous.	3	Green	Large	175cm
Picea abies Virgata A "snake" spruce. Doesn't make many side branches. Just bizarre. Fast growing.	3	Green	Large	175cm
Picea abies Wartburg Fast growing weeping form. Maintains its leader once staked.	3	Green	Intermediate	175cm
Picea abies Wattbrund A blue cast on this spreading dwarf make this one stand out.	3	Bluish	Dwarf	60cm
Picea abies Will's Zwerg A very compact conical upright. The leaves are bright green unlike any other cultivar of this species.	3	Green	Dwarf	120cm
Picea abies Wingle Weeper A prostrate form with very thick needles and stems.	3	Green	Dwarf	120cm

### Chinese Dragon Spruce

Picea asperata The Chinese Dragon Spruce has long needles and grows into a stately specimen to 70 feet. We offer smaller clones suited to smaller gardens as well.	5	Green	Large	150cm
Picea asperata China Blue A selection with bright blue needles. Very rare.	5	Blue	Large	150cm
Picea asperata Morton A selection of Chinese Tiger Spruce found at the Morton Arboretum outside Chicago. Fast and full growing.	5	Green	Large	150cm
Picea asperata Nana An extremely rare dwarf of blue/green needles. Grows about 10cm a year.	6	Bluish/Green	Dwarf	100cm
Picea asperata Red Seedling New growth an amazing red later maturing to green. Quite Stunning for a few weeks in the spring.	5	Red/Green	Intermediate	120cm

Picea austromanchurica	3	Green	Large	150cm
A rare subspecies possibly of Picea obovata. Extremely hardy.				

### Chinese Silver Spruce

Picea brachytyla	5b	Green/Silver	Large	150cm
Pretty spruce to 15m. Green upper side colour and silver underneath. Quite attractive and showy. Probably best suited out of extreme winter wind and sun.				

### Siskiyou Spruce

Picea breweriana	6	Green	Intermediate	120cm
Possibly the most graceful of all the spruces. Very pendulous Side branches. Needs protection in our climate. Native to the Rockies.				

<b>Picea breweriana x omorika</b>	6	Blue/ Green	Intermediate	100cm
A hybrid of the Serbian and Siskiyou spruce. Really nice colour.				

### Alcocks Spruce

Picea bicolor	5	Green/Silver	Large	150cm
The species is densely pyramid with silver undersides and give this plant a nice look. Doesn't grow too large.				

Picea bicolor Dwarf Tigertail	5	Green/Silver	Dwarf	120cm
A very pretty pyramidal with distinctive colouring. Grows about 4 inches a year. Great plant.				

Picea bicolor Howell's Tigertail	5	Green/Silver	Intermediate	120cm
Beautiful tri-coloured selection often growing very wide. Needles are silver underneath with orange stems.				

Picea bicolor Prostrata	5	Blue/Green	Dwarf	100cm
Flat globose dwarf. Nice colour works well with other plants.				

### Engelman Spruce

Picea engelmanni Compacta	4	Bluish	Dwarf	100cm
Nice compact form of the Engelman Spruce. Dense pyramid over time.				

Picea engelmanni Girard's Monstrossa	4	Grey/Blue	Dwarf	80cm
New plant for me but grows much like a globe but spruce with an interesting colour to it. Will likely become conical over time.				

Picea engelmanni Glauca	4	Blue	Large	150cm
Beautiful bright blue needles adorn this pyramidal tree. Needles are softer than Colorados.				

Picea engelmanni Harbour Blue	4	Blue	Intermediate	150cm
Deeper blue colour. Semi dwarf upright. Eye catching as it gets older. Grows about 6 inches a year.				

Picea engelmanni Hoodie	4	Green/Blue	Dwarf	100cm
A tight growing conical dwarf. Found on Mt. Hood Washington. Excellent rock garden plant.				

Picea engelmanni Low Blow	4	Blue	Dwarf	60cm
A witches broom grows quite slowly. Globe form.				

Picea engelmanni Snake	4	Blue	Large	150cm
A beautiful (in my opinion) Engelman spruce that forgets to				

make side branches. Has a very open look. Grows 1 foot a year.

### Dwarf Alberta Spruce Selections

Picea glauca albertiana Classic garden conifer. Dense cone slow growing. Should avoid south western exposure in winter.	4	Green	Dwarf	120cm
Picea glauca albertiana Daisy's White Spring growth a creamy white. Persists for many weeks before changing to green. Remarkable selection.	4	Cream/White	Dwarf	120cm
Picea glauca albertiana Globe The globe form the Dwarf Alberta Spruce. Excellent rock garden plant.	4	Green	Dwarf	60cm
Picea glauca albertiana Iseli's Witches Broom A mounding globose form. Will be as wide as it is high.	4	Green	Dwarf	80cm
Picea glauca albertiana Jean's Dilly A beautiful dark green selection that grows much slower than the species.	4	Green	Dwarf	80cm
Picea glauca albertiana Laurin Possibly the smallest form available. Grows about 1inc a year. From England.	4	Green	Miniature	50cm
Picea glauca albertiana Rainbow's End Initially green but the second flush is bright yellow. Tends to Keep a gold cast to it until next spring.	4	Green/Yellow	Dwarf	120cm
Picea glauca albertiana Sander's Blue A blue Alberta spruce. Grows like the species.	4	Blue	Dwarf	100cm

### White Spruce

Picea glauca Caerulea A powder blue selection of the white spruce. Quite showy.	3	Blue	Large	150cm
Picea glauca Christy Relatively slow growing globose dwarf form. Grows 3 inches a year.	3	Blue/Green	Dwarf	80cm
Picea glauca Ducharme Ultra small. Tiny little bundle of needles. Good for a pot or trough.	3	Green	Miniature	40cm
Picea glauca Fort Ann A snake white spruce. Very few side branches. Just bizarre.	3	Bluish	Intermediate	175cm
Picea glauca Gold Form A yellow needled selection. Grows the same as the species.	3	Yellow	Large	150cm
Picea glauca Golden Harbour New growth flushes out in a bright lime green/yellow colour. Grows fast.	3	Green/ Yellow	Large	150cm
Picea glauca Heartland Broom Another extremely slow growing variety.	3	Green	Dwarf	50cm
Picea glauca Hudsonii Probably the bluest form of white spruce. Rivals some Colorado varieties. Quite rare.	3	Blue?gray	Large	175cm
Picea glauca (Indian Trail) A selection that is grey/green in summer and bright gold in winter. Never offered in North America before until now.	3	Green/Gold	Large	150cm
Picea glauca Lace Info coming.	3	Grey/Green	Intermediate	120cm
Picea glauca Little Globe	3	Grey/Green	Dwarf	60 cm

A tiny perfect globe with good colour. Grows about 2 inches a year.

*Picea glauca* (Little Jeffery) 3 Green Miniature 60cm  
Very tight eventually conical white spruce. Definitely a rock garden candidate.

*Picea glauca* Mac's Golden 3 Yellow/Green Large 150cm  
New growth bright yellow turning to a medium green colour.

*Picea glauca* North Star 3 Green Large 120cm  
A new selection of white spruce. More info coming.

*Picea glauca* Pendula 3 Blue/Grey Large 150cm  
Has a central leader with all branches strictly weeping. One Of the most sought after plants in the trade. Absolutely beautiful.

*Picea glauca* Thompsen 3 Blue Dwarf 100cm  
An extremely dense growing globe. Grows 3 inches a year.

#### Hurst Spruce (*P. engelmanni* x *P. pungens*)

*Picea* x Hursti 3 Blue/Green Large 150cm  
Nice hybrid occurring naturally in the wild. In cultivation since 1938.

#### Yezzo Spruce

*Picea jezonensis* Chitsomarsu 5b Green Dwarf 100cm  
Pretty dwarf form of the Yezzo Spruce which should become conical over time. Nicely silvers and subtle yellows in the needles.

*Picea jezonensis* var. *Hondoensis* 5b Green Large 120cm  
Slower growing sub species that does become large over time.

#### Honshu Spruce

*Picea koyamai* 3 Green Large 150cm  
Pyramidal form to 30 feet. A spruce from Japan where only a few hundred trees exist.

#### Chinese Purple Cone Spruce

*Picea likiangensis* var. *Purpurea* 3 Green Large 150cm  
Purple coned Chinese spruce. Cones turn bright red before changing to purple. Very short needled.

#### Black Spruce

*Picea mariana* *Aureovariegata* 3 Gold/Green Intermediate 120cm  
A black spruce with blue needles and gold over the top of the branches. Makes a stunning specimen.

*Picea mariana* *Doumetti* 3 Grey./Blue Intermediate 120cm  
An old French selection. Good colour and grows very dense. Super hardy.

*Picea mariana* *Fastigiata* 3 Grey./Blue Dwarf 100cm  
A rare variety that is upright. Good for colour and small spaces.

*Picea mariana* *Nana* 3 Grey Dwarf 80cm  
Lovely little dwarf globe. Nice colour and super hardy.

#### Serbian Spruce

*Picea omorika* 5 Blue/Silver Large 100cm  
Graceful spruce with up sweeping branches. One of the smaller growing species and makes nice specimen.

*Picea omorika* *Amble Wood* 5 Blue/Silver Dwarf 60cm

Another super tight and slow growing plant. Really nice.

Picea omorika Aurea New growth is yellow followed by its traditional blue and silver colour. A really beautiful plant and hard to find.	5	Gold/Blue/Green	Large	120cm
Picea omorika Berliner's Weeper A new weeping selection that has a central leader with all side branches pendulous.	5	Blue/Green	Intermediate	100cm
Picea omorika Bruns Superb form of Serbian spruce. Very graceful branching sweeping upwards at the tips.	5	Blue/Green	Large	120cm
Picea omorika Bruns Pendula The most sought after Serbian weeping spruce. It is the narrowest form available in blue and silver.	5	Blue/Green	Intermediate	120cm
Picea omorika Elizabeth Grows much the same as Nana but doesn't make a central leader. From Germany.	5	Green/ Blue	Dwarf	80cm
Picea omorika Freya Dwarf upright growing. New plant.	5	Silver/Blue	Dwarf	100cm
Picea omorika Gunter More info coming.	5	Silver/Blue	Dwarf	80cm
Picea omorika Kuck's Weeping A weeping form that needs to be staked for height. Very rare still.	5	Green/Blue	Dwarf	100cm
Picea omorika Nana A popular globe that will form a leader. A great garden plant.	5	Blue/Green	Dwarf	120cm
Picea omorika Pendula An old form that has very pendulous branching with the tips sweeping slightly upwards.	5	Blue/Green	Intermediate	120cm
Picea omorika Pimoko Great little globe plant. Good colour and works well in the landscape.	5	Blue/Green	Dwarf	60cm
Picea omorika Raraflora New, info coming.	5	Blue/Green	Large	100cm
Picea omorika Riverside An American selection chosen for its perfect form and fast growth rate.	5	Blue/Silver	Large	150cm
Picea omorika TC Weeping A narrow weeping form of good colour and habit. RARE!	5	Blue/Green	Intermediate	150cm
Picea omorika Treblitz New dwarf form from Europe.	5	Blue/ Green	Dwarf	60cm
Picea omorika Weeping Incredibly narrowing weeping form. A seedling from Pendula Bruns.	5	Blue/Green	Intermediate	100cm
Picea omorika White Tops New growth white before changing to its typical blue green silver colour.	5	White/ Blue	Intermediate	100cm
Picea omorika Wodan A tiny fuzz ball of needles. Slow growing and irregular in Growth. Never seen it offered any but here.	5	Blue/Green	Dwarf	60cm
<b>Hybrid Serbian and Black Spruce</b>				
Picea X Mariorika Machala Nice hybrid that stays globose. Needles have a striking colour.	5	Blue/Green	Dwarf	90cm

### Caucasian Spruce

Picea orientalis Aurea	5	Yellow/Green	Large	120cm
Spring growth a bright yellow before turning to dark green . A light golden sheen may persist all year.				
Picea orientalis Barnes	5	Green	Dwarf	100cm
Great globe type. A little more vigorous than Bergman's Gem. Very dark needled.				
Picea orientalis Bergmans Gem	5	Green	Dwarf	100cm
Dwarf flat globe growing 10cm a year. Very dark green needles.				
Picea orientalis Compacta	5	Green	Dwarf	100cm
An old but very rare Caucasian spruce. Dense conical upright. Seldom available.				
Picea orientalis Compacta Nana	5	Green	Dwarf	100cm
A true dwarf pyramid. Slow grower. Very difficult to find in the trade.				
Picea orientalis Connecticut Turnpike	5	Green	Dwarf	100cm
Fairly fast growing dwarf that spreads as wide as high.				
Picea orientalis Fat Boy	5	Green	Dwarf	60cm
New. Info coming.				
Picea orientalis Gowdy	5	Green	Large	150cm
Fairly fast growing form of the species. Nice shape and dense growing.				
Picea orientalis Gracilis	5	Green	Intermediate	100cm
Broad upright. Small needled. Grows 1 foot a year.				
Picea orientalis Lemon Spreader	5	Yellow/Green	Dwarf	80cm
A spreading nest spruce type with bright yellow new growth later changing to green with some yellow frosting. Grows about 4 inches a year.				
Picea orientalis Nigra Compacta	5	Green	Dwarf	80cm
A squat little plant that will eventually develop a leader.				
Picea orientalis Raraflora	5	Green	Large	150cm
Fast growing form. Don't know much about this one yet. American introduction.				
Picea orientalis Silver Seedling	5	White/Green	Dwarf	80cm
Slow growing form with white and green needles. Extremely rare.				
Picea orientalis Skylands	5	Gold	Large	120cm
The golden upright version. Gold needled year round. Has red cones. Young plants can burn in full sun. Very stunning.				
Picea orientalis Tom Thumb	5	Gold	Dwarf	40cm
A witches broom from Skylands. Incredible little plant. Grows 1 inch a year.				

### Tiger Tail Spruce

Picea polita	5	Green	Large	150cm
Remarkable species from Japan. Emerald needles are so sharp they will skew just about anything that touches it.				

### Colorado Spruce

Picea pungens Aurea	3	Gold/Blue	Large	150cm
New growth lemon yellow later turning bluish green. Nice form.				
Picea pungens Baby Blue Eyes	3	Blue	Large	175cm
Beautiful conical upright with great form and habit. Considered one of better blue spruces in the trade.				

Picea pungens Bakeri A perfect pyramid with good colour. Easy growing. One of the best.	3	Blue	Large	175cm
Picea pungens Benno Good dark blue on the round form. Grows about 3 inches a year.	3	Blue	Dwarf	80cm
Picea pungens Blue Mist A plant that often stays rounded until a leader takes over. Very dense grower. Slower than other varieties.	3	Blue	Large	150cm
Picea pungens Bob's Broom New blue round witches broom. Boring name but nice plant.	3	Blue	Dwarf	80cm
Picea pungens Buchholz A real standout. Very hard to describe its colour but can be seen a mile away. Slow growing.	3	Yellow	Large	100cm
Picea pungens Christina New. Info coming.	3	Blue	Dwarf	80cm
Picea pungens Colonial Gold New growth deep yellow changing to bluish. New.	3	Gold/Blue	Large	150cm
Picea pungens Corbet Nice dwarf bright blue pyramid. Slow growing but worth the wait.	3	Blue	Dwarf	100cm
Picea pungens Egyptian Pyramid A slow started but forms a very dense and full pyramid of light blue needles.	3	Blue	Large	120cm
Picea pungens Erich Frahm Fast growing form from Germany. Good colour.	3	Blue	Large	150cm
Picea pungens Fala Aurea New growth bright yellow. Keeps its colour year round.	3	Gold/Blue	Large	120cm
Picea pungens Fat Albert A symmetrical selection from Iseli. Not a dwarf as many think. Grows to 30 feet.	3	Blue	Large	175cm
Picea pungens Ferrence Skirt New. Info coming.	3	Blue	Dwarf	100cm
Picea pungens Freeport A perfect round ball of green. From a witches broom. Grows about 4 inches a year.	3	Green	Dwarf	100cm
Picea pungens Girards Aurea This one has a lot of wow factor. Bright yellow year round. Slow growing but makes a nice little pyramid over time.	3	Gold	Dwarf	100cm
Picea pungens Girards Dwarf Blue New. Info coming.	3	Blue	Dwarf	100cm
Picea pungens Glauca Globosa Classic and well known garden conifer. Grafted plants tend to form a leader. Often grafted as standards.	3	Blue	Dwarf	80cm
Picea pungens Glauca Nana A little known conical plant. Slow growing. Great rock garden plant. Rare.	3	Blue	Dwarf	80cm
Picea pungens Globe Globose and extremely slow growing. Dense little ball. Very interesting.	3	Green	Miniature	50cm
Picea pungens Gold Find New. Info coming.	3	Yellow/Blue	Large	120cm
Picea pungens Gotelli Prostrate A creeping form is not staked form the Gotelli Collection at the	3	Blue	Dwarf	80cm

National Arboretum in Washington, D.C.

Picea pungens Hillside Very slow growing green globe with smaller than usual needles. Great little rock garden plant.	3	Green	Dwarf	60cm
Picea pungens Hoopsii One of the best in the silver blue group. Takes a little work to make a nice tree but it is stunning over time.	3	Silver/Blue	Large	175cm
Picea pungens Iseli Fastigiata Upright narrow tree. Good plant for where blue is needed but little space available.	3	Blue	Intermediate	150cm
Picea pungens Iseli's Foxtail Upright tree with needles decreasing along the length of new growth.	3	Blue	Intermediate	150cm
Picea pungens Jean Iseli New. Info coming.	3	Blue	Dwarf	80cm
Picea pungens Linda's Mad Dancer Upright dwarf that weaves and winds its way skyward. Grows 5 inches a year.	3	Blue/ Green	Dwarf	100cm
Picea pungens Maigold Beautiful selection from Germany. New growth yellowish changing to blue. Becomes stunning over time.	3	Blue/Gold	Intermediate	120cm
Picea pungens Mesa Verde A truly unique looking broom. Dark green needles. Grows flat and outwards. One of my favourite Colorado spruce brooms.	3	Green	Dwarf	60cm
Picea pungens Meyer's Gold Bright yellow flush in spring later changing to blue but still leaving gold frosting on top.	3	Gold/Blue	Intermediate	100cm
Picea pungens Millcreek Broom New. Info coming.	3	Blue	Dwarf	80cm
Picea pungens Mission Blue Solid blue on a conical upright. Dense form.	3	Blue	Large	175cm
Picea pungens Montgomery A large bright blue shrub growing about 4 inches a year.	3	Blue	Intermediate	80cm
Picea pungens Mrs. Cessarini New. Info coming.	3	Blue/Green	Dwarf	100cm
Picea pungens Nana Irregular growth which will form a leader over time. Rare plant seldom found outside arboretums.	3	Blue	Dwarf	60cm
Picea pungens Glauca Pendula An old weeping variety. Needs to be staked to for height. Becomes a striking specimen in time.	3	Blue	Intermediate	120cm
White Lion Colorado Spruce Picea pungens Offet This plant is hard to describe. New growth creamy but retains its whitish foliage year round with green. Super dense.	3	Green/White	Large	120cm
Picea pungens Pendens A slow growing upright form with short down sweeping branches. Quite distinct.	3	Blue	Large	100cm
Picea pungens Porcupine Irregular upright. Leaves bright blue. Only grows 2 inches per year.	3	Blue	Dwarf	80cm
Picea pungens Procumbens A weeping type that mounds or can be staked. Very effective draped over walls or rocks.	3	Blue	Dwarf	100cm
Picea pungens Prostrata	3	Blue	Dwarf	100cm

A true creeping form. Doesn't have a tendency to form a leader. Makes a very interesting ground cover.

Picea pungens Rifle Blue Irregular growing plant. Suspect it will eventually make a leader. A novelty.	3	Blue	Dwarf	100cm
Picea pungens R. Kluis New. Info coming.	3	Blue	Dwarf	80cm
Picea pungens Royal Knight Dense pyramid of good blue colour. Grows about a foot a year.	3	Blue	Large	120cm
Picea pungens Sester's Dwarf Interesting texture on this dwarf pyramid. Slow growing. Nice colour	3	Blue	Dwarf	100cm
Picea pungens Snake A bizarre form with virtually no side branches. Rare.	3	Blue	Large	100cm
Picea pungens Spring Ghost Unbelievable white new growth changing to a bluish green. Super rare.	3	Blue/White	Intermediate	100cm
Picea pungens St. Mary's Broom This is the most popular of the miniature type brooms on the market Today. Mounds, very tight and compact.	3	Silver/Blue	Dwarf	80cm
Picea pungens Sunshine Very rare gold form that has a nice spring yellow before turning green and keeping some of its gold colour on the top of the needles.	3	Gold/Green	Intermediate	120cm
Picea pungens Tallmadge Burly Another bizarre form. Grows every which way but up.	3	Blue	Dwarf	100cm
Picea pungens Thompsen Good growing conical form with silver/blue needles. Easier to form a make a landscape tree than Hoopsii.	3	Silver/Blue	Large	175cm
Picea pungens Thuem Globe type very similar to glauca globosa or Montgomery. Grows about 10cm a year.	3	Blue	Dwarf	90cm
Picea pungens Waterfall A dwarf weeping selection. New.	3	Blue	Dwarf	80cm
Picea pungens Wisconsin Cream New growth creamy white later changing to mainly green. Rare. Slower growing.	3	Cream/Green	Large	100cm
Picea pungens Woodstock Very dense flat growing globe. Found by my friend Rich Eyre from Foxwillow Pines in Woodstock, Illinois.	3	Green/Blue	Dwarf	80cm
<b>Picea pungens Kosterii x omorika</b> Incredible hybrid. All the great colours of a blue spruce with The branches structure of a Serbian Spruce. In my opinion one of the most ornamental trees you can get.	4	Silver/Blue	Large	100cm
<b>Red Spruce</b> Picea rubens A native spruce found in eastern Canada. Important timber Tree.	4	Green	Large	100cm
Picea rubens Pocono Dwarf conical upright. Grows about 4 inches a year.	4	Green	Dwarf	100cm
<b>Himalayan Spruce</b> Picea smithiana	5	Grey/Green	Large	150cm

Himalayan Spruce with very long needles. All branchlets are very pendulous making it a very graceful tree.

### Sitka Spruce

*Picea stichensis* Papoose 5 Silver/ Green Dwarf 60cm  
A dwarf round ball of silvery blue and green needles. Good rock garden plant. Doesn't like exposed sites.

### Pines

#### White Bark Pine

*Pinus albicaulis* Algonquin Pillar 5 Green Intermediate 150cm  
Rare columnar cultivar of the White Barked Pine.

#### Bristlecone Pine

*Pinus aristata* Sherwood Compact 5 Green Dwarf 100cm  
Beautiful compact pyramid of the Bristle Cone Pine. Grows about 5-10cm a year.

#### Armand Pine

*Pinus armandi* 5 Green Large 200cm  
Fast growing elegant tree. Long needled. Makes a great specimen.

#### Mexican White Pine Hybrid

*Pinus X ayachuite* 5 Green Large 175cm  
A cross between the Mexican White and Eastern White Pine. Long wispy green needles. Rare in any collection.

#### Jack Pine

*Pinus banksiana* Mamomet 3 Green Miniature 30cm  
A true miniature globe. Even the needles are dwarf being only a 1/4 inch long.

*Pinus banksiana* Schoodic 3 Green Dwarf 80cm  
A small shrub. Mounding. Slow growing.

*Pinus banksiana* Tear Drop 3 Green Dwarf 80cm  
Oval upright staying quite tight.

*Pinus banksiana* Uncle Foggy 3 Green Intermediate 100cm  
A bizarre weeping form. No two plants ever grow the same. Grows about 8 inches a year.

#### Chinese Lace Bark Pine

*Pinus bungeana* 5 Green Large 120cm  
A slower growing tree that has beautiful bark in tones of cream and mocha colours highly prized.

*Pinus bungeana* Compacta 5 Green Dwarf  
A dense selection that is often multi trunked. Grows upright.

*Pinus bungeana* Rowe Arboretum 5 Green Intermediate 120cm  
A dense growing form of the Chinese Lacebark Pine that is often multi-trunked. Grows about 10cm per year. Stays

*Pinus bungeana* Silver Ghost 5 Green Large 175cm  
Selected for its striking silver bark with tones of white and tan. Grows 1 foot a year. Original at the Dawes Arboretum in Ohio.

*Pinus bungeana* Temple Gem 5 Green Intermediate 150cm  
New. Info coming.

#### Swiss Stone Pine

*Pinus cembra* Chalet 4 Silvery/Green Intermediate 150cm

Another nice tight growing pyramidal selection. Grows About 4 inches a year.

Pinus cembra F.F. A dwarf tight columnar form. Ultimate height unknown. Grows 2 to 4 inches a year.	4	Green	Dwarf	100cm
Pinus cembra Glauca A narrow conical growing tree. Blue leaves stand out. Extremely hardy	4	Silvery Blue	Intermediate	150cm
Pinus cembra Holden Arboretum A formal looking selection.	4	Silver/Green	Large	120cm
Pinus cembra Landis A more dwarf and compact version of the Swiss Stone Pine. Hardy. Mature at 15 ft.	4	Green	Intermediate	120cm
Pinus cembra Looney A squat pyramid type. Can be wider than tall for many years.	4	Green	Intermediate	150cm
Pinus cembra Nana A very slow pyramidal tree to 15 feet.	4	Green	Dwarf	100cm
Pinus cembra Stricta A true dwarf upright. A wonderful rock garden plant. Grows about 2 inches a year.	4	Green	Dwarf	80cm

### Lodgepole Pine

Pinus contorta Chief Joseph Emerald green pyramid that turns a blinding yellow as the cold weather sets in. Slow growing, mature at 12 feet.	5b	Green/ Gold	Intermediate	80cm
Pinus contorta Fastigiata A very narrow form of the Lodgepole pine. Grows about 6 inches a year.	5b	Green	Intermediate	100cm
Pinus contorta Spaan's Dwarf A most interesting variety with very short needles. Open and round. Makes a perfect rock garden or bonsai specimen.	5b	Green	Dwarf	80cm
Pinus contorta Taylor's Sunburst New growth bright yellow later changing to green. What a stand out in the crowd. Grows about 1 foot a year.	5b	Green	Intermediate	120cm

### Japanese Red Pine

Pinus densiflora Aurea A golden Japanese Red Pine. Grows about 6 inches per year. Needs winter protection or planted where it will only get the morning sun. Lime green in summer.	5b	Bright Yellow	Dwarf	100cm
Pinus densiflora Cessarini Variegated An improved selection of the Dragon's Eye Pine with more variegation throughout. Needs filtered sunlight so not to burn in the winter.	5b	Gold Banded	Dwarf	120cm
Pinus densiflora Glitzer's Pendula A nice weeping form that isn't so brittle as Pendula. Emerald green needles with orange bark.	5B	Green	Dwarf	120cm
Pinus densiflora Jane Kluis Globose form with dark buds. Grows about 4 inches a year. Thought to be a hybrid. Very elegant look to it.	5b	Green	Dwarf	80cm
Pinus densiflora Oculus Draconis The Dragon's Eye Pine. Distinct yellow banding on every needle. May be slightly hardier than Cessarini Variegated.	5b	Gold Banded	Dwarf	120cm
Pinus densiflora Pendula A very pendulous version of the Japanese Red Pine. Stake to desired height and let it cascade around rocks, pools and borders.	5b	Green	Dwarf	100cm

Pinus densiflora Tanyosho Table top pine growing to 20 feet. Bark becomes distinctly orange with age.	5b	Green	Intermediate	120cm
--	----	-------	--------------	-------

**Limber Pine**

Pinus flexilis Amy Marie Nice little bun with good colour. From the Jerry Morris Collection.	5	Blue	Dwarf	40cm
Pinus flexilis Arapaho A dwarf upright originating from a witches broom. Good bonsai or rock garden plant.	5	Blue/Green	Dwarf	60cm
Pinus flexilis Cessarini Blue A narrow growing upright with cobalt blue needles. Cones are red.	5	Blue	Large	120cm
Pinus flexilis El Seedling A dwarf selection that is upright. Forms a dense little pyramid.	5	Green/Blue	Dwarf	80cm
Pinus flexilis Extra Blue An upright form with powder blue needles. Grows 4 inches a year.	5	Blue	Intermediate	120cm
Pinus flexilis Fast Fred Fast open growing tree. Can grow a foot a year.	5	Green	Intermediate	120cm
Pinus flexilis Glenmore Upright formal form with good colour.	5	Blue/Green	Large	100cm
Pinus flexilis Long Arm Another dwarf form from the Jerry Morris collection.	5	Blue/Green	Dwarf	80cm
Pinus flexilis Pendula Strong growing weeping form needs to be staked for height otherwise it will creep around.	5	Green	Intermediate	100cm
Pinus flexilis Southbridge Variegated A heavily variegated form with creams and yellows throughout the tree. Thought to be a White Pine cultivar but I disagree.	5	Variegated	Large	150cm
Pinus flexilis Vanderwulf's Pyramid Blue green needles on a columnar Limber Pine. Can grow over a foot a year.	5	Blue	Large	175cm
Pinus flexilis Watnong A fast growing form of the Limber pine. Nice colour from the Watnong collection. Grows over a foot a year.	5	Blue/Green	Large	150cm
Pinus flexilis Witches Broom Seedling A W.B. seedling given to me by Rich Eyre. Upright growing Looks like a miniature of the species.	5	Green/Silver	Dwarf	50cm

**Jefferey Pine**

Pinus jefferyi Joppi A dwarf ball of very long needles. Very rare.	5	Green	Dwarf	80cm
---	---	-------	-------	------

**Kwangtung Pine**

Pinus kwangtungensis Closely allied with Pinus parviflora. Fast growing with dark blue needles. Very rare in North America.	5	Blue	Large	175cm
--	---	------	-------	-------

**Korean Pine**

Pinus koreansis Anna A blue needled form named by Chubb Harper for his wife who passed away recently.	5	Blue	Large	175cm
Pinus koreansis Avocadra Exceptionally long needles blue form. New for me.	5	Blue	Intermediate	120cm
Pinus koreansis Dwarf Form	4	Blue	Dwarf	80cm

Dwarf upright with smaller needles.

Pinus koreansis Jack Corbet Somewhat more compact variety of the Korean Pine. Long silver blue needles. Great tree for northern climates.	4	Silvery Blue	Large	175cm
Pinus koreansis Glauca Good pyramidal form with long blue needles. Cones a quite large. Highly recommended.	4	Blue	Large	175cm
Pinus koreansis Morris Blue Extremely blue needled selection out of the Morris Arboretum.	4	Blue	Large	175cm
Pinus koreansis Nana Slower growing than the species. Long blue needles. Dense growing.	4	Blue	Dwarf	90cm
Pinus koreansis Oculus Draconis Never seen the variegation yet. Needles have a crimped look to them.	4	Green	Large	175cm
Pinus koreansis Rowe Another fine blue needled form. Becomes a large specimen.	4	Blue	Large	175cm
Pinus koreansis Spring Grove One of the first witches brooms available from the Korean Pine. Dense round ball. RARE!	4	Blue	Dwarf	40cm
Pinus koreansis Winton A compact rounded selection found in England.	4	Green/Blue	Intermediate	120cm
Pinus koreansis x wallichiana Beautiful hybrid of the Korean and Himalayan Pine. Super Long needles. Will become a stately specimen.	4	Blue/ Silver	Large	150cm

#### **Bosnian Pine**

Pinus leucodermis Aureospicata A green shrub form with gold frosting on the tips of the Needles. Eye catching. Colour intensifies in cold weather.	4	Green/ Gold	Intermediate	100cm
Pinus leucodermis Compact Gem Slow growing compact pyramid. Dark green needles are very stiff.	4	Green	Dwarf	100cm
Pinus leucodermis Emerald Arrow Interesting columnar type with dark green needles.	4	Green	Intermediate	120cm
Pinus leucodermis Irish Bell A nice squatty pyramid. Very dark green needles and tight Growing. Choice plant from Iseli Nurseries.	4	Green	Dwarf	80cm
Pinus leucodermis Schmidti One of the slowest growing forms available. Grows about 1 inch a year in a tight ball.	4	Green	Miniature	40cm
Pinus leucodermis Tannenbaum A perfect formed Bosnian Pine. Dark green and pyramidal.	4	Green	Large	120cm

#### **Bristlecone Pine**

Pinus longaeva Formal Form A perfect growing pyramid on a species that can live thousands of years. Grows 2-3 inches a year.	4	Green	Dwarf	100cm
Pinus longaeva Rezek A slow growing selection by the late horticultural guru Ed Rezek.	4	Green	Dwarf	80cm

#### **Western White Pine**

Pinus monticola Nana Tiny buds, tiny needles, tiny growth. Tiny ball. Just tiny.	5b	Green	Miniature	50cm
Pinus monticola Pendula Very rare selection of the Western White Pine. Grows about 4 inches a year. Can be completely prostrate.	5b	Green	Dwarf	80cm

Pinus monitcola Skyline New. Info coming.	5b	Green	Intermediate	100cm
--	----	-------	--------------	-------

**Mugo Pine**

Pinus mugo Aurea A gold version of the mugo pine. May need periodic pruning to keep it dense.	3	Gold	Dwarf	80cm
--	---	------	-------	------

Pinus mugo Corley's Mat A spreading selection that stays quite low. Suitable for rock gardens. From England.	3	Green	Dwarf	80cm
---	---	-------	-------	------

Pinus mugo Dave's Choice A witches broom found on Mops. Super slow growing. Difficult to propagate	3	Green	Miniature	30cm
---	---	-------	-----------	------

Pinus mugo Elfingreen Another tight growing globose form that stays reliably dwarf.	3	Green	Dwarf	80cm
--	---	-------	-------	------

Pinus mugo Fastigiata A columnar form with dark green needles. Unusual for the species. Grows about 8 inches a year.	3	Green	Intermediate	120cm
---	---	-------	--------------	-------

Pinus mugo Fastigiata Aurea Stunning gold colour in winter with a soft yellow in summer. Grows 6 inches a year and doesn't seem to burn in the winter sun.	3	Gold	Dwarf	120cm
---	---	------	-------	-------

Pinus mugo Fructata New. Info coming.	3	Green	Dwarf	80cm
--	---	-------	-------	------

Pinus mugo Gold Spire New. Info coming.	3			
--	---	--	--	--

Pinus mugo Leucoformis A mugo pine that mimicks the upright and pyramidal growth and appearance of the Bosnian pine.	3	Green	Dwarf	100cm
---	---	-------	-------	-------

Pinus mugo Mayfair Another extremely growing selection. Never needs shearing. Grows 2-3 inches a year.	3	Green	Miniature	30cm
---	---	-------	-----------	------

Pinus mugo Mops Globose and compact. Dark green needles make a nice contrast with other plants in the garden	3	Green	Dwarf	60cm
---	---	-------	-------	------

Pinus mugo Ophir A mugo with more or less a bright yellow year round. Dense little globe. Grows about 3 inches a year.	3	Gold	Dwarf	80cm
---	---	------	-------	------

Pinus mugo Oregon Pixie Very tight growing mini form. Definite rock garden plant.	3	Green	Miniature	60cm
--	---	-------	-----------	------

Pinus mugo Pal Maleter Very attractive form that is more less yellow year round. Colour is best in the winter.	3	Green/ Gold	Dwarf	100cm
---	---	-------------	-------	-------

Pinus mugo Per Golden New. Info coming.	3	Golden	Dwarf	100cm
--	---	--------	-------	-------

Pinus mugo Prostrata An old creeping selection that is becoming rare. Ground hugging.	3	Green	Dwarf	80cm
--	---	-------	-------	------

Pinus mugo Sherwood Compact An upright dwarf globe. Grows about 2inches a year.	3	Green	Dwarf	60cm
--	---	-------	-------	------

Pinus mugo Teeny Very tiny little bun of needles. My plants grows about 1 inch a year.	3	Green	Dwarf	60cm
---	---	-------	-------	------

Pinus mugo Wies Blue A mugo with a blue cast to it. Very unusual and rare for the species. Grows about 4 inches a year.	3	Bluish	Dwarf	80cm
--	---	--------	-------	------

Pinus mugo Wintergold A relatively fast growing form. Lime green summer, bright yellow in winter. Doesn't burn. Very hardy.	3	Yellow	Dwarf	100cm
Pinus mugo Yellow Point Spreading type with yellow on the end of its branches. Grows 6 inches a year.	3	Green/Yellow	Dwarf	100cm
<b>Austrian Pine</b>				
Pinus nigra Aurea New growth is gold later turning green. Very showy.	4	Green/Yellow	Large	100cm
Pinus nigra Arnold's Sentinel A strict fastigiate form. Dark green needles	4	Green	Intermediate	100cm
Pinus nigra Bambino New dwarf form. Info coming.	4	Green	Dwarf	80cm
Pinus nigra Black Prince Upright form with super dark green needles.	4	Green	Intermediate	100cm
Pinus nigra Breppo Globe form with long needles. Grows 4 inches a year.	4	Green	Dwarf	80cm
Pinus nigra Contorta To me a plant that does whatever it wants. Does grow upright but with time spreads out. Strong growing.	4	Green	Large	100cm
Pinus nigra Frank A dwarf columnar form. Excellent for small spaces. Just an excellent variety.	4	Green	Intermediate	100cm
Pinus nigra Globe Flat round globe. May mound over time. Grows 3 inches a year.	4	Green	Dwarf	60cm
Pinus nigra Helga A dwarf round witches broom with a German origin. Not as dark green as some other dwarf types.	4	Green	Dwarf	80cm
Pinus nigra Hornibrookiana A somewhat irregular growing witches broom found in Rochester, New York. May develop a leader over time.	4	Green	Dwarf	100cm
Pinus nigra Select Green Compact tree. Dark green needles and white buds.	4	Green	Intermediate	150cm
Pinus nigra Wurstle A nice ball of long needles. Has little tufts on the ends. Witches broom out of Germany.	4	Green	Dwarf	80cm
<b>Japanese White Pine</b>				
Pinus parviflora Adcock's Dwarf Beautiful upright globe. Small leaves and slow growing. Not as hardy as other parviflora types.	6	Bluish	Dwarf	100cm
Pinus parviflora Al Fordham Similar to Adcock's Dwarf but hardier. Grows 2 to 3 inches a year.	5	Green/Blue	Dwarf	100cm
Pinus parviflora Aoba Jo Small needled upright. Nice blue colour. Can grow 8 inches a year.	5	Blue/Green	Dwarf	100cm
Pinus parviflora Ara Kawa The wart barked pine. Interesting exfoliating bark with blue needles. Grows about 6 inches a year.	5	Blue	Dwarf	100cm
Pinus parviflora Baldwin Layered branches on a narrow upright. Good bonsai choice.	5	Green	Dwarf	120cm
Pinus parviflora Bergman One of the nicest blue selections of parviflora compact with twisted needles on the ends. Grows 4-6inches a year.	5	Blue	Intermediate	150cm

Pinus parviflora Bonnie Bergman Beautiful compact shrub form. Also has twisted needles.	5	Blue	Dwarf	100cm
Pinus parviflora Blue Wave New variety in the trade. Seems to grow much like Bergman and Glauca.	5	Blue	Intermediate	150cm
Pinus parviflora Brevifolia Short needled green blue needles. Can grow up to a foot a year.	5b	Green	Intermediate	150cm
Pinus parviflora Cleary A larger upright form with powder blue needles. Opens up with time. Grows 6 inches a year.	5b	Blue	Intermediate	150cm
Pinus parviflora Dr. Landis Fantastic little pyramid of dense blue needles. Haven't seen a large specimen but the young ones look very nice.	5b	Blue	Dwarf	100cm
Pinus parviflora Eiko Nishiki A dwarf upright selection. Grows about 1 foot a year. Short needles.	5b	Blue/Green	Dwarf	100cm
Pinus parviflora Fukai Very rare selection with yellow banding throughout the plants. Just striking. Could use some protection in the garden from winter sun.	6	Gold/Green	Dwarf	120cm
Pinus parviflora Fukai Seedling New. Info coming.	5	Gold/Green	Dwarf	100cm
Pinus parviflora Fukuzumi Interesting layered effect that often grows in a windswept fashion. Grows about 6 inches a year. Very hardy.	5	Blue	Intermediate	120cm
Pinus parviflora Gimborn's Ideal A large growing shrub type. Grows about 8 inches a year.	5	Blue/Green	Large	150cm
Pinus parviflora Gimborn's Pyramid Narrowly pyramidal. Semi dwarf. Grows about 4 inches a year.	5	Blue/Green	Intermediate	120cm
Pinus parviflora Glauca Faster growing with distinct blue needles. Cones readily. Quite hardy.	5	Blue	Intermediate	120cm
Pinus parviflora Glauca Broom Dense growing upright. Light blue needles. Could also be Glauca compacta.	5	Blue	Dwarf	100cm
Pinus parviflora Goldilocks A fuzzy gold Japanese White pine. Really lights up your day.	5	Gold	Dwarf	100cm
Pinus parviflora Hagaromo One of the smallest dwarf forms available. Grows about 1 inch a year. Dwarf in all respects.	5	Green	Dwarf	40cm
Pinus parviflora Hime Goyo Matsu Dwarf variety can be sparsely branched. Often used in Bonsai	5	Green	Dwarf	80cm
Pinus parviflora Ibo Can Dense growing upright with blue and silver needles.	5	Blue/Green	Intermediate	100cm
Pinus parviflora Miyajima Beautiful cobalt blue needles on a dense upright form. Grows 3 inches a year.	5	Blue	Dwarf	80cm
Pinus parviflora Nago Very short powder blue needles on this open branched clone.	5	Blue	Intermediate	100cm
Pinus parviflora Nana A dwarf narrow upright. Branches and needles are thick. Slow growing.	5	Blue/Green	Dwarf	80cm
Pinus parviflora Negeshi A bonsai type that grows upright. Layered branching.	5	Green	Intermediate	100cm

Pinus parviflora Ogon	5	Green/Yellow	Dwarf	100cm
Slow growing. Muted yellow persists year round. Grows to 8 feet.				
Pinus parviflora Ogon Janome	5	Green/Yellow	Dwarf	100cm
A Dragon's Eye of the Japanese white pine. Every needle is banded or spotted with deep yellow.				
Pinus parviflora Pendula	5	Green	Dwarf	100cm
A weak growing selection doesn't seem to be in a hurry to weep.				
Pinus parviflora pentaphylla Nasu	5	Blue	Intermediate	120cm
Long blue needles on a fairly fast growing tree. Very showy.				
Pinus parviflora Shi Ko Kin	5	Green	Dwarf	100cm
Small tree with green needles. More information coming.				
Pinus parviflora Shi On	5	Blue	Dwarf	80cm
Dwarf dense globe of steel blue needles. Excellent rock garden choice.				
Pinus parviflora Shoon's Bonsai	5	Green	Intermediate	100cm
Dense growing tree with twisted needles and branches. Like a dwarf version of P. strobus Contorta.				
Pinus parviflora Tano Mani Uki	5	White/Pink/Green	Dwarf	80cm
The Japanese Snow Pine. Green needles with white dusting. The candles are pink in the spring.				
Pinus parviflora Tanomi Goyo	5	Blue	Dwarf	100cm
Upright shrub type. Interesting tufts of blue needles.				
Pinus parviflora Templehof	5	Green	Large	150cm
Fast growing cultivar. Leaves are green with blue under tones mixed in.				
Pinus parviflora Variegata	5	Variegated	Dwarf	100cm
Deep yellow mixed on green needles. Mature size not known.				
Pinus parviflora Venus	5	Grey-Green	Intermediate	120cm
Narrow upright with grey green foliage. Strong growing. Interesting contrast plant.				
Pinus parviflora Watnong	5	Blue/Green	Intermediate	120cm
Small tree or large multi trunked shrub. Good blue foliage. Can be 20 feet wide.				
Pinus parviflora Yezzo-Alpina	5	Green	Dwarf	100cm
Upright variety with horizontal branching. May grow to 8 feet.				

#### **Macedonian or Balkan Pine**

Pinus peuce Glauca	5	Blue	Large	120cm
Pretty blue needled selection that is quite rare. Grows about 5 inches a year.				
Pinus peuce Jeddelloh	5	Blue	Intermediate	100cm
Grey/ blue needles on a shrub type form. Grows about 4 inches a year.				
Pinus peuce Nana	5	Grey/Green	Miniature	60cm
A miniature conical upright that grows about 1 inch a year. Should be 2 feet round in 20 years..				

#### **Ponderosa Pine**

Pinus ponderosa Hi Desert	5	Green	Dwarf	100cm
A witches broom that is globose and does not make a leader. Slow growing.				
Pinus ponderosa Long Needle	5	Green	Large	150cm
Interesting tree with needles that can be over a foot long.				

Grows almost a foot a year.

### Japanese Stone Pine

Pinus pumila Dwarf Blue A spreading plant with thick blue foliage. Grows 2-3 inches a year.	5	Blue	Dwarf	80cm
Pinus pumila Glauca A mounding plant to 6 feet. Quite rare now.	5	Blue/Green	Dwarf	80cm
Pinus pumila National Arboretum 20397 Flat topped blue needled dwarf form the National Arboretum in Washington.	5	Blue	Dwarf	80cm

### Red Pine

Pinus resinosa Native 2 needled pine. Adaptable to poor soils conditions. Usued by the MNR for years in forestry plantings in Southern Ontario.	3	Green	Large	100cm
Pinus resinosa Don Smith A dwarf upright globe. Grows 4 inches a year.	3	Green	Dwarf	80cm
Pinus resinosa Morel A spreading globe. Leaves a nice rich green. Grows 4 inches a year.	3	Green	Dwarf	80cm
Pinus resinosa Quinobequin Bright green needles on a dense growing globe. Can grow 6 inches a year.	3	Green	Dwarf	80cm

### South Western White Pine

Pinus strobiformis The South Western White Pine. Broadly pyramidal and can grow over a foot a year.	5	Green	Large	150cm
Pinus strobiformis Coronado New. Info coming.	5	Green	Dwarf	80cm
Pinus strobiformis Densata A dwarf variety with blue needles. Upright growing. Nice for the rock garden.	5	Bluish	Dwarf	100cm
Pinus strobiformis Foxtail Interesting tapered growth on each branch. Grows as a globe.	5	Bluish	Dwarf	100cm
Pinus strobiformis Glauca A fast growing blue form now in the trade.	5	Blue	Large	150cm
Pinus strobiformis Loma Linda Dwarf globe form found as a witches broom. Quite attractive.	5	Green	Dwarf	80cm
Pinus x schwerini Wiethorst New. Info coming.	5	Green	Intermediate	100cm

### Eastern White Pine

Pinus strobus Our native pine. Soft green needles. Often used in paintings up north. Grows fast, 2-3 feet a year.	4	Green	Large	150cm
Pinus strobus Angel Falls Probably the most elegant weeping White pine available. Graceful drooping branches needs staking for height.	4	Green	Large	120cm
Pinus strobus Bakke Broom Flat topped broom found by a friend of mine. Grows 3 inches a year.	4	Green	Dwarf	80cm
Pinus strobus Bennet Clumpleaf	4	Green	Large	150cm

An usual looking form with all of its needles "glued" together.  
Fast growing. Otherwise the same as the species.

Pinus strobus Bennet Contorted A contorted form in all respects, even the needles. Grow 8 inches a year.	4	Green	Large	150cm
Pinus strobus Bennet OD Leaves are bright yellow. Even the branches and trunk have gold in them. Grows up to a foot a year.	4	Gold	Intermediate	120cm
Pinus strobus Bergman's Variegated The dragon's eye form of white pine. Very delicate and dainty plant. Becomes a show piece.	4	Gold/Green	Dwarf	100cm
Pinus strobus Big Red Large round growing ball of green needles. This broom needs room.	4	Green	Dwarf	100cm
Pinus strobus Bloomer Dark Green Globe A dwarf globe possibly the darkest green needles of any strobus cultivar. Grows 2-3 inches a year.	3	Green	Dwarf	100cm
Pinus strobus Blue Heaven Intense silvery blue needles. Somewhat open growing. Has a wispy look. Grows 1 foot a year.	3	Blue	Large	200cm
Pinus strobus Blue Shag A dwarf round flat globe. Needles blue green. Grows about 3 inches a year.	3	Bluish	Dwarf	80cm
Pinus strobus Brevifolia A dwarf form that has very short needles.	3	Green	Dwarf	80cm
Pinus strobus Colson's Nest Another dense growing round type. Grows up to 4 inches a year.	3	Green	Dwarf	80cm
Pinus strobus Columnaris An upright form that mimics the pyramidal English Oak. Grows over a foot a year.	3	Green	Large	200cm
Pinus strobus Contorta A narrow upright tree with contorted needles. Can grow to 40 feet.	3	Green	Large	200cm
Pinus strobus Chippanock Nice flat and dense growing broom. It has a nice texture and look to it.	3	Green	Dwarf	60cm
Pinus strobus Chippewa A dwarf flat globe of Canadian origin with silvery needles. Only grows 2 inches a year.	3	Green	Dwarf	80cm
Pinus strobus Densa An upright conical dwarf with bluish tones in the needles. Good rock garden candidate.	3	Green	Intermediate	120cm
Pinus strobus Diggy Real dense form with a soft and fuzzy look to it. Nice plant.	3	Green	Dwarf	80cm
Pinus strobus Explosion A dwarf round globe. Some needles contorted.	3	Green	Dwarf	60cm
Pinus strobus Fastigiata A narrow columnar form of our White Pine. Fast growing.	3	Green	Large	200cm
Pinus strobus Fastigiata Devine New. Info coming.	3	Green	Large	175cm
Pinus strobus Freddy Kruger A spreading globe type. Grows 3 inches a year	3	Green	Dwarf	80cm
Pinus strobus Fructata Interesting pyramidal form that cones at a really early age.	3	Green	Dwarf	100cm

Grows 4 inches a year.

Pinus strobus Glauca Nana Flat growing globe with deeper blue needles. Grows 6 inches a year.	3	Bluish	Dwarf	100cm
Pinus strobus Golden Candles A slow growing selection with bright yellow new growth later changing to gold and green. One of my favourites.	3	Gold	Large	120cm
Pinus strobus Gold Painted Grows like the species but with gold flecks throughout.	3	Yellow/Green	Large	200cm
Pinus strobus Green Twist A witches broom that was found growing on P. str. Contorta at the Bickelhaupt Arboretum in Iowa. Very twisted branches and needles.	3	Green	Dwarf	60cm
Pinus strobus Hillside Gem A tiny pyramid with short needles. Slow growing.	3	Green	Dwarf	80cm
Pinus strobus Honest Abe A creeping selection reportedly found in the cemetery where Abraham Lincoln is buried. Must be staked for height.	3	Green	Dwarf	100cm
Pinus strobus Horsford Dwarf Little dwarf flat ball. Extremely compact. Grows 3 inches a year.	3	Green	Dwarf	80cm
Pinus strobus Horsford Sister Another super dense ball of green needles. Grows about 3 inches a year.	3	Green	Dwarf	80cm
Pinus strobus Jericho A slow dense dark green form. Irregular growing. Quite nice.	3	Green	Intermediate	120cm
Pinus strobus JN Pyramid New. Info coming.	3	Green		
Pinus strobus Kane New. Info coming.	3	Green	Dwarf	80cm
Pinus strobus Kate Brook The narrowest form of Eastern White Pine I know of with 10 foot specimens being only 18 inches wide. Intriguing.	3	Green	Large	175cm
Pinus strobus Louie A bright yellow variety of the eastern white pine. Grows over a foot a year.	3	Yellow	Large	175cm
Pinus strobus Martin's Mini Very dense bun type. Everything about it is mini.	3	Green	Miniature	80cm
Pinus strobus Minima Very slow growing mound. Only grows 2 inches a year.	3	Green	Dwarf	60cm
Pinus strobus Nana An old cultivar growing 3 to 4 inches a year. Will mound up over time.	3	Green	Dwarf	80cm
Pinus strobus National Life I believe the first variegated witches broom on the market. Usually is bright yellow.	3	Yellow	Dwarf	80cm
Pinus strobus Oliver's Dwarf Don't know much about this one yet but it doesn't stay small.	3	Green	Dwarf	80cm
Pinus strobus Ontario Irregular globe. Tends to mound over time.	3	Green	Dwarf	100cm
Pinus strobus Ottawa A fast weeping selection found in Illinois I believe. Just keeps on spreading.	3	Green	Dwarf	150cm
Pinus strobus Pendula Fast growing cultivar. Stake for height. Does mound. No	3	Green	Large	175cm

two trees look alike.

Pinus strobus Pine Valley A witches broom found by Jeff Scott. Spreads and should mound with time.	3	Green	Dwarf	60cm
Pinus strobus Pygmae Tiny round globe. Old cultivar. Should be in a container or rock garden.	3	Green	Miniature	40cm
Pinus strobus Rezek's Broom Beautiful little plant. Extremely dense. Grows flat and round.	3	Green	Miniature	40cm
Pinus strobus Sea Urchin A dwarf flat globe. Extremely compact and dense.	3	Green	Miniature	50cm
Pinus strobus Short Needle A beautiful dwarf globe with nice blue needles. Too bad it doesn't have a nicer name.	3	Blue	Dwarf	60cm
Pinus strobus UCONN Larger growing dwarf that is upright. Can grow 6 inches a year.	3	Green	Dwarf	80cm
Pinus strobus Umbraculifera An old cultivar that is quite rare now. Irregular globe to 8 feet with time.	3	Green	Dwarf	80cm
Pinus strobus Verkade's Special A reasonably fast growing witches broom. Grows 3 inches a year in a perfect globe.	3	Green	Dwarf	100cm
Pinus strobus White Mountains Fast growing upright with bright blue needles. Becomes quite large.	3	Blue/Silver	Large	200cm
Pinus strobus White Tip An introduction from BC. New growth white turning green later. Grows about a foot a year.	3	Green/White	Large	200cm
Pinus strobus Wiggles Another witches broom found on "Contorta"? Anyway, small and cute.	3	Green	Dwarf	60cm
Pinus strobus Wind Swept Small irregular globe. Branches sometime want to grow the same way.	3	Green	Dwarf	60cm
Pinus strobus Wintergold More less green needled variety that turns gold in colder weather. Grows a foot a year.	3	Green/Gold	Large	200cm

### Scotch Pine

Pinus sylvestris Often used in hedge rows. Mature specimens have orange bark. Can grow 2 feet or more a year.	3	Green	Large	150cm
Pinus sylvestris Albyn's Prostrata A true creeping selection that must staked for height. Will form an amazing carpet given time.	3	Green	Dwarf	100cm
Pinus sylvestris Aurea An old selection of Scotch Pine. Needles turn a bright gold in winter. Grows about 8 inches a year.	3	Gold/Green	Intermediate	150cm
Pinus sylvestris Beacon Hill Forms a perfect globe. Dense growing. Good for standards.	3	Green	Dwarf	60cm
Pinus sylvestris Bennett Compact Just a ball of needles. Extremely dense and slow. Maybe 1 inch a year.	3	Green	Miniature	40cm
Pinus sylvestris Bonna The bluest Scotch Pine in the trade. Fast growing and has deep blue needles.	3	Blue	Large	200cm
Pinus sylvestris Fastigiata	3	Green	Large	200cm

Narrow form with all branches ascending upwards. Should be wrapped in areas of heavy snow loads.

Pinus sylvestris Glauca Nana Larger dwarf with hints of blue in the foliage. Grows in a globe form.	3	Bluish	Intermediate	120cm
Pinus sylvestris Gold Medal Beautiful bright yellow in winter. Grey/ green in summer. A winner!	3	Gold	Intermediate	100cm
Pinus sylvestris Greg's Variegated Intermittent creamy yellow branching through out the tree.	3	Variegated	Intermediate	120cm
Pinus sylvestris Hillside Creeper A mounding and spreading plant. Only grows 2 feet high can spread to 8 feet. Makes an interesting ground cover.	3	Green	Dwarf	60cm
Pinus sylvestris Inverleith Probably my favourite Scot's pine with its creamy new growth and "glow" in the dark effect after the needles mature. From Scotland.	3	Cream	Intermediate	80cm
Pinus sylvestris Mitsch Weeping A weeping Scotch Pine. Branches tend to be contorted. Makes an interesting specimen.	3	Green	Intermediate	100cm
Pinus sylvestris Saxatilis Very slow grower. Grows flat and doesn't make very many branches.	3	Green	Dwarf	40cm
Pinus sylvestris Sentinel A more compact and dwarf fastigiata.	3	Green	Intermediate	120cm
Pinus sylvestris Viridis Compacta A dwarf upright globe. Looks very fuzzy. Mature at 5 feet.	3	Green	Dwarf	100cm
Pinus sylvestris Watereri A semi-dwarf that is globe shaped. Has been in the trade for a long time. Grows 4 to 6 inches a year.	3	Blue/Green	Dwarf	100cm
Pinus sylvestris Wolting's Gold A green tree in summer and the brightest gold in winter. Will light up any dark corner of the garden.	3	Gold	Dwarf	100cm

### Chinese Red Pine

Pinus tabulaformis Known as the Chinese Red Pine. Has a nice waxy green colour. Broadly pyramidal in youth. Grows about 6 inches a year.	5	Green	Large	175cm
---	---	-------	-------	-------

### Japanese Black Pine

Pinus thunbergii Kotobuki Dwarf little pyramid of the Japanese Black Pine. Dark green needles.	6	Green	Dwarf	80cm
Pinus thunbergii Oculus Draconis The dragon's eye version of the Japanese Black Pine. Otherwise grows like the species.	6	Variegated	Large	120cm

### European Mountain Pine

Pinus uncinata A species of pine very closely related to the Mugo pine. Grows into a tree form rather than a shrubby plant.	3	Green	Large	120cm
Pinus uncinata Silver Candles New. Info coming.	3	Green		

### Virginia Pine

Pinus virginiana Wate's Golden Upright and open growing. Green needled in the summer and bright yellow in winter.	4	Green/Yellow	Large	200cm
--	---	--------------	-------	-------

## Himalayan Pine

Pinus wallichiana Densa Hilli 6 Green Dwarf 100cm  
Nice compact globe type with long drooping needles.  
Grows 3 inches a year.

Pinus wallichiana Green Giant (Morton Arboretum) 5b Green Large 175cm  
A hardy selection of the Himalayan Pine. Very long needles.  
Becomes quite large.

Pinus wallichiana Zebrina 6 Variegated Large 150cm  
Lovely green and creamy yellow banding on this clone.  
Very sensitive to sun and wind.

## False Japanese Larch

Psuedolarix amabilis 5b Green Large 150cm  
Looks very much like a larch and turning bright yellow in the  
fall before losing its leaves. Quite hardy. Fairly rare  
in cultivation. Grows over 6 inches a year.

## Douglas Fir

Psuedotsuga menziesii Aurea 5 Gold Large 150cm  
Bright yellow flush in spring changing to a medium green by  
late summer. Young plants need some protection from hot  
sun and strong winter winds.

Psuedotsuga menziesii Aureovariegata 5 Gold Large 150cm  
Creamy variegation throughout the plant gives this its distinctive  
look. Grows about 6-8 inches a year.

Psuedotsuga menziesii Blue 5 Blue Large 175cm  
Blue foliage year round. Grows about 1 foot a year. Tall pyramidal.

Psuedotsuga menziesii Carnifix Weeping 5 Green Large 120cm  
A dramatic weeping version that from what I've seen cones  
readily and which makes it look all the more attractive.

Psuedotsuga menziesii Castle 5 Grey Dwarf 60cm  
A thick branched dwarf. Grows 2 inches a year.

Psuedotsuga menziesii Dandy Doug 5 Green Miniature 40cm  
Very tiny bun type, just full of bright red buds. One or 2 inches  
a year.

Psuedotsuga menziesii Emerald Twister 5 Green Intermediate 100cm  
A bizarre form that is contorted and spires its way upward.  
Really interesting.

Psuedotsuga menziesii Environmentalis 5 Green Dwarf 80cm  
A perfect dark green pyramid on this dwarf. One of my favourites.

Psuedotsuga menziesii Dekalb's Weeping 5 Grey Intermediate 100cm  
An interesting weeping tree that forgets to make very many  
side branches. Has a ghostly look to it with age. Grows 6 inches  
a year.

Psuedotsuga menziesii Doug's Dandy 5 Green Dwarf 40cm  
A tiny little globe. Cute but probably isn't cuddly for most.

Psuedotsuga menziesii Fastigata 5 Grey/Green Large 175cm  
A true columnar selection with all branches strictly upright.  
Grows about 10 inches a year.

Psuedotsuga menziesii Fretzii 5 Green Intermediate 120cm  
A dense shrub of dark green. Needles very short and stubby.

Psuedotsuga menziesii G.G. 5 Green Dwarf 60cm  
New. Info coming.

Psuedotsuga menziesii Glauca 5 Green/Blue Large 175cm  
New growth a nice powder blue latter turning to grey/green.

Psuedotsuga menziesii Grace 5 Green Dwarf 80cm

A dense slow growing conical form. Nice rock garden plant.  
Grows 2 inches a year.

Psuedotsuga menziesii Graceful Grace Probably the nicest weeping Douglas fir. The silver stomates show because of the slightly twisted needles.	5	Green/Grey	Intermediate	120cm
Psuedotsuga menziesii Hale New. But I believe its a dwarf lime green/yellow pyramid. Info coming.	5	Yellow	Dwarf	100cm
Psuedotsuga menziesii Helms Upright compact pyramid. Dark green needles growing 6 inches a year.	5	Green	Intermediate	100cm
Psuedotsuga menziesii Hillside Gold Spring growth is powder blue later green and in the winter the tree turns gold.	5	Green/Blue	Intermediate	120cm
Psuedotsuga menziesii Hillside Pride Small compact dwarf form.	5	Green	Dwarf	80cm
Pseudotsuga menziesii Hillside Yellow A Douglas fir that is entirely bright yellow year round. Isn't that nifty?	5	Yellow	Large	120cm
Pseudotsuga menziesii Holy Family Irregular globe with dark green needles. Found in Iowa.	5	Green	Dwarf	80cm
Pseudotsuga menziesii Little Jon Slow growing pyramid with light green needles. Becoming popular.	5	Green	Dwarf	80cm
Pseudotsuga menziesii Marshall One of the bluest clones available. From a distance I first thought it was some new Colorado spruce.	5	Blue	Large	120cm
Psuedotsuga menziesii Mucronata Irregular prostrate. Grows about 3 inches a year.	5	Grey/Green	Dwarf	80cm
Psuedotsuga menziesii Nana Round bun of dark green needles. This could be a collective name for many dwarf forms. Grows 2 inches a year.	5	Green	Dwarf	80cm
Psuedotsuga menziesii Pendula A weeping tree that needs to be staked for height. Makes a dramatic specimen.	5	Green	Intermediate	120cm
Psuedotsuga menziesii Poncha Dwarf little ball. More information coming.	5	Green	Dwarf	60cm
Psuedotsuga menziesii Pumila Dwarf globe habit. Grows about 3 inches a year.	5	Blue/Green	Dwarf	60cm
Psuedotsuga menziesii Quaintenace New to us more information coming.	5	Green	Dwarf	60cm
Pseudotsuga menziesii Sinclair Weeping A fast but "thin" grower. Very pendulous side branches.	5	Green	Intermediate	120cm
Psuedotsuga menziesii Skyline A snake type plant. Branches don't have any side stems. Looks bizarre.	5	Blue/Grey	Large	175cm
Psuedotsuga menziesii Sweet Sara Dwarf globe habit. Grows 2 inches a year.	5	Green	Dwarf	60cm
Psuedotsuga menziesii Trunky New to us more information coming.	5	Green	Dwarf	60cm
Pseudotsuga menziesii Unamed Dwarf Tight little bun of a plant that needs a cool name.	5	Green	Dwarf	60cm
Pseudotsuga menziesii Wagon Trails	5	Green/Blue	Large	80cm

New. Info coming. Hi ho silver.

Pseudotsuga menziesii Wycoff's Big Blue 5 Blue Large 150cm  
Fast growing form with powder blue needles. Makes an imposing specimen

Pseudotsuga menziesii Wycoff's Compact 5 Grey Dwarf 100cm  
Dense growing little tree with an interesting blue grey Needle colour.

### Giant Redwood

Sequoiadendron giganteum Blauer Eichzweg 6 Blue Dwarf 100cm  
Powder blue colour on a narrow upright. Needs to be planted in a sheltered area.

Sequoiadendron giganteum Hazel Smith 6 Grey/Blue Large 150cm  
Reportedly the hardest redwood. Grows like the species around 1-2 feet a year. Still should be planted in a protected area.

Sequoiadendron giganteum Pendulum 6 Green Large 150cm  
One the most bizarre, classy and elegant looking weeping conifers. Very touchy here. I have had one in my garden for 3 winters with out any dieback. Strickly pendulous with a leader.

### Bald Cypress

Taxodium distichum 5 Green Large 175cm  
Soft light green needles turn bronze in the fall. If planted near water they grows "knees". Becomes a stately specimen.

Taxodium distichum Cascade Falls 5b Green Large 175cm  
Wonderful weeping selection to come along. Very fast growing. New from New Zealand.

Taxodium distichum Fastigiata 5 Green Large 200 cm  
A fairly narrow variety with a formal symmetrical look. Can grow 8 inches a year.

Taxodium distichum Peve Minaret 5 Green Dwarf 120cm  
A very cool introduction from Holland. Grows like the species but is dwarf in all respects. Very nice plant.

Taxodium distichum Peve Yellow 5 Yellow Intermediate 100cm  
A slower growing yellow in summer, bronze in fall selection. Could use a little protection from the sun when young.

Taxodium distichum Secrest 5 Green Dwarf 80cm  
A very interesting witches broom from the Secrest Research Station in Ohio. Flat top and round. Looks like a wagon wheel.

Taxodium distichum Shawnee Brave 5 Green Large 200cm  
New columnar form that is attractive year round.

### Pond Cypress

Taxodium ascendens Deboniar 6 Green Large 200cm  
Narrowly columnar form. New.

Taxodium ascendens Nutans 6 Green Large 200cm  
New. Info coming.

### Yew

#### English Yew

Taxus baccata 5b Green Large 100cm  
Large but slow growing classic European garden plant. Often not considered here but the Montreal Botanic Gardens has proved otherwise.

Taxus baccata Amersfoort 5b Green Dwarf 80cm  
A cool dwarf with squatty rounded needles. Probably needs

a little protection but well worth the effort.

Taxus baccata Fowle Another oddly shaped needle clone. Grows a little faster and wider than Amersfoort.	5b	Green	Dwarf	100cm
Taxus baccata Melford A great columnar form of the English Yew. Very dark green, all branches strickly ascending. Best in formal situations.	5	Green	Intermediate	100cm
Taxus baccata Paul's Gold New growth bright gold later changing to a dark green. Shrub type. Grows around 6 inches a year.	5b	Green/ Yellow	Intermediate	100cm
Taxus baccata Standishii New growth yellow and can leave gold throughout the needle Slow growing and needs a bit of protection.	5b	Green/Yellow	Intermediate	80cm
Taxus baccata Variegata New growth a nice yellow, later turning green. Winter colour bronze. Surprisingly hardy.	5	Yellow/Green	Intermediate	120cm
<b>Canadian Yew</b>				
Taxus canadensis Usually shrubby and spreading green in summer, brown in winter. I can honestly say not a plant to write home about.	3	Green	Intermediate	100cm
Taxus canadensis f. Stricta A more upright selection of the above.	3	Green	Dwarf	100cm
<b>Chinese Yew</b>				
Taxus chinensis A hardly ever cultivated species from China. Interesting for the collector.	5	Green	Intermediate	100cm
<b>Japanese Yew</b>				
Taxus cuspidata Bright Gold Extremely bright yellow foliage year round. Fully hardy but Needs to be sighted away from hot dry locations.	5	Yellow	Intermediate	100cm
Taxus cuspidata Delightful Cruise A selection from Dr. J. Cruise. Dwarf, super dark green needles on a fairly rounded plant. Probably the best bonsai yews I've ever seen.	5	Green	Dwarf	80cm
Taxus cuspidata Monloo Very dark green spreading yew. Slower growing but will get large over time.	5	Green	Intermediate	80cm
Taxus cuspidata var. Pyramidalis Pyramidal form of the Japanese Yew. Dark green needles.	5	Green	Intermediate	120cm
Taxus cuspidata Nana A very dwarf dense spreading mound. Glossy dark green leaves.	5	Green	Dwarf	100cm
Taxus x hunnelwelliana Richard Horsey Spreading type with smaller dark green needle. Can grow up to 10 inches a year. One of my favourites.	5	Green	Intermediate	100cm
<b>Hybrid Yew</b>				
Taxus x media Aurescens Shrub like with new growth gold, fading to a gold glow over green.	5	Gold/Green	Intermediate	120cm
Taxus x media Densiformis A more rounded form of Yew. Takes well to pruning, often clipped into globes. Makes a nice low hedge also.	5	Green	Intermediate	120cm
Taxus x media Bean Pole Super narrow type as the name suggests. Dark green and extremely narrow growing. Very hard to find.	5	Green	Dwarf	100cm

Taxus x media Flushing Good tight upright formal form. All branches strictly upright. Grows about 6 inches a year.	5	Green	Intermediate	120cm
Taxus x media Hicksii A narrow growing selection with upright branches. Often used for hedges.	4	Green	Intermediate	120cm
Taxus x media Hills One of the many uprights often used in hedging.	5	Green	Intermediate	120cm
Taxus x media Maureen Beautiful narrow columnar form. Relatively new. At maturity it may be 2 feet wide.	5	Green	Dwarf	100cm
Taxus x media Pilaris Also a nice column form to come along. Good green colour and stays nice and tight.	5	Green	Intermediate	100cm
Taxus x media Sunburst Bright yellow yew that keeps its colour year round. Female clone so it has the red berries.	5	Yellow	Intermediate	100cm

### Cedar

#### Korean Cedar

Thuja koriensis Pretty species with drooping foliage. Has nice blue undertones in the plant. Needs protection from winter wind.	5b	Green	Intermediate	100cm
--	----	-------	--------------	-------

#### Eastern White Cedar (Arborvitae)

Thuja occidentalis Beaufort Oval dwarf with some juvenile foliage. Grows 4 inches a year.	4	Green	Intermediate	120cm
Thuja occidentalis Boothii Large growing globe not unlike Woodwardi in growth and habit.	4	Green	Intermediate	120cm
Thuja occidentalis Brabant Fast growing dark green year round. Needles have a shiny look to them.	4	Green	Large	175cm
Thuja occidentalis Brandon Upright form, dark green. Suitable for hedging. Keeps its colour year round. Grows about 1 foot a year.	4	Green	Large	200cm
Thuja occidentalis Calvary #2 Irregular globe which mounds in the middle. Odd looking foliage.	4	Green	Dwarf	80cm
Thuja occidentalis Danica Dense round ball with sprays vertical. Quite Dwarf.	4	Green	Dwarf	80cm
Thuja occidentalis Davey A nifty witches broom that grows in a pyramid with interesting foliage. Found by my friend Dave Horst in Iowa.	4	Green	Dwarf	80cm
Thuja occidentalis Degroot's Spire Stickily upright growing and dense. Interesting texture.	4	Green	Intermediate	120cm
Thuja occidentalis Densifomis A form not unlike Pyramidalis perhaps a little slower growing. Very dense and conical.	4	Green	Intermediate	120 cm
Thuja occidentalis Emerald (Smargd) Bright green tree of a pyramidal shape. Good specimen.	4	Green	Intermediate	150cm
Thuja occidentalis Europe Gold Very dense pyramidal form with golden foliage year round. Mature	4	Gold	Intermediate	150cm

at 20 feet.

Thuja occidentalis Ellwangeriana Juvenile foliage that has a distinct purple colour in winter. Grows into an irregular pyramid.	4	Green	Dwarf	100cm
Thuja occidentalis Ellwangeriana Aurea Same as above but yellow in summer turns a deeper gold bronze in winter.	4	Gold	Dwarf	100cm
Thuja occidentalis Fastigiata Nice compact narrow columnar plant. Good for tight spaces.	4	Green	Intermediate	150cm
Thuja occidentalis Filiformis Lacy leaved form of White Cedar. Grows and looks much like the Chamaecyparis pisifera Filifera form but a little hardier.	4	Green	Dwarf	100cm
Thuja occidentalis Globosa Old form that is a giant round ball to 10 feet.	4	Green	Dwarf	100cm
Thuja occidentalis Globosa Aurea I believe a gold sport from Globosa. Grows the same but a bit slower.	4	Gold	Dwarf	100cm
Thuja occidentalis Gold Cargo New. Info coming.	4	Gold	Dwarf	80cm
Thuja occidentalis Gold Drop Nice golden dwarf pyramid. Chance seedling from Holmstrup. Grows about 4 inches a year. Great new plant.	4	Gold	Dwarf	100cm
Thuja occidentalis Golden Globe Rounded form with bright yellow foliage year round. Another good accent plant.	4	Gold	Dwarf	100cm
Thuja occidentalis Hetz Midget Old cultivar that is globose in nature and the needles sprays are twisted sideways. Squatty pyramidal shape with time.	4	Green	Dwarf	80cm
Thuja occidentalis Hetz Wintergreen Very fast growing form that is cylindrical. Stay green year round. Can grow 3 feet a year.	4	Green	Large	150cm
Thuja occidentalis Holmstrup #2 Slow growing dense pyramide deep gold on outside and yellow green on the inside. Truly beautiful plant.	4	Yellow	Intermediate	100cm
Thuja occidentalis Hoserii Dwarf globe form to about 3 feet round.	4	Green	Dwarf	80cm
Thuja occidentalis Little Champion Grows into a perfect round ball. Grows about 4 inches a year.	4	Green	Dwarf	100cm
Thuja occidentalis Little Elfie Little dwarf globe with dainty sprays of foliage. Very slow growing.	4	Green	Dwarf	80cm
Thuja occidentalis Little Gem Tiny globe with green needles. Suitable for the rock garden.	4	Green	Dwarf	80cm
Thuja occidentalis Little Giant Globose form growing about 5 inches a year.	4	Green	Dwarf	100cm
Thuja occidentalis Malonyana Perhaps the most beautiful columnar form. It can have a 4 foot base and be nearly 30 feet tall. From Hungary.	4	Green	Large	120cm
Thuja occidentalis Masonic Slow growing column. Mature at 8 feet.	4	Green	Dwarf	100cm
Thuja occidentalis Mr. Bowling Ball A round ball of juvenile foliage. Has a very interesting look to it.	4	Green	Dwarf	80cm
Thuja occidentalis Nigra Dark green foliage on a fast growing pyramidal tree. Good for hedging.	4	Green	Large	150cm

Thuja occidentalis Ohlendorffi Bizarre form that is stingy and coarse. Shrub like in growth. For the collector.	4	Green	Dwarf	100cm
Thuja occidentalis Pendula Slow growing weeping tree. Height depends on culture.	4	Green	Dwarf	100cm
Thuja occidentalis Pine Knoll Rare witches broom I believe from Iowa. Slow growing. Interesting texture. Grows 2-3 inches a year.	4	Green	Dwarf	80cm
Thuja occidentalis Pyramidalis An old classic narrow form. Stays narrow. Grows a foot a year.	4	Green	Large	150cm
Thuja occidentalis Recurva Nana Basically a dwarf globe with recurved needles. Grows 4 inches a year.	4	Green	Dwarf	100cm
Thuja occidentalis Rheindiana Very dwarf and dense globe form.	4	Green	Dwarf	80cm
Thuja occidentalis Rheingold Golden juvenile foliage year round. Makes a striking accent plant when mixed with other coloured conifers.	4	Gold	Dwarf	100cm
Thuja occidentalis Rosencran Year round gold pyramid. Bright yellow in summer, deeper gold in winter. Grows about 6 inches a year.	4	Gold	Large	120cm
Thuja occidentalis Sherwood Moss Juvenile foliage on an irregular globe to 10 feet. Withstands shearing.	4	Green	Dwarf	100cm
Thuja occidentalis Spiralis An upright conical plant with twisted foliage giving it a unique texture.	4	Green	Intermediate	120cm
Thuja occidentalis St. John's Mini Cute little pyramidal tree. Interesting foliage. Suitable rock garden choice. Grows 3 inches a year.	4	Green	Dwarf	100cm
Thuja occidentalis Stolwick New growth white later turning green. Still retains some white year round. Very interesting plant.	4	Green/White	Dwarf	100cm
Thuja occidentalis Sunkist A slow growing gold form. Not as pyramidal as Europe Gold. Winter colour a bit darker gold/orange.	4	Gold	Dwarf	120cm
Thuja occidentalis Teddy A tiny cuddly form of white cedar. Very soft juvenile foliage. Extremely dense growing.	4	Green	Dwarf	60cm
Thuja occidentalis Tetragona Another shrub like form with unusual growth. Once it gets bigger it will spark a few comments.	4	Green	Dwarf	100cm
Thuja occidentalis Tiny Tim Real small bun like form. Very slow growing. 2 inches a year.	4	Green	Dwarf	60cm
Thuja occidentalis Trompenburg Dark green foliage on the inside becomes progressively lighter until it is almost gold. Very compact and slow growing.	4	Green/Gold	Dwarf	100cm
Thuja occidentalis Wansdyke Silver Interesting sprays of cream throughout an otherwise pyramidal green cedar. Eye catching.	4	Variegated	Intermediate	100cm
Thuja occidentalis Wareana Lutescens Nice old columnar selection with a subdued yellow. Makes a great specimen over time.	4	Muted Yellow	Intermediate	120cm
Thuja occidentalis Woodwardi Another old globose selection to 15 feet. Makes for an interesting specimen over time. Seen them used as hedges.	4	Green	Intermediate	120cm

Thuja occidentalis Yellow Ribbon	4	Gold	Intermediate 120cm
Bright yellow on a tight growing pyramidal form. Excellent accent plant.			

**Oriental Cedar**

Thuja orientalis Berkmans' Aurea	5	Yellow	Dwarf 120cm
Nice upright form with yellow foliage that intensifies with the on set of cold weather.			
Thuja orientalis Filiformis	5b	Green	Dwarf 80cm
Especially stringy version of this species. Lite green colour with some yellow striations on the twigs. Should be protected.			
Thuja orientalis Franky Boy	5	Green	Dwarf 80cm
Another threadleaf type but grows upright.			
Thuja orientalis Fruitlandii	5	Green	Intermediate 150cm
An especially vigorous form with dark green needles. Good plum colour in winter.			
Thuja orientalis Morgan	5	Lime Green	Intermediate 120cm
Lime green/yellow in summer orange/red in winter. Oval upright Truly Stunning plant. Grows 4 inches a year.			
Thuja orientalis Van Hoey Smith	5	Green/Gold	Intermediate 100cm
New growth soft orange/ yellow turning dark green. Very showy.			
Thuja orientalis Whistling Gardens	5	Green	Intermediate 100cm
A tree found in an old cemetery that was especially wide and compact. Unlike any form I've ever seen. Propagated just before the tree was cut down.			

**Western Red Cedar**

Thuja plicata Can Can	5	Green	Large 120cm
New growth white tipped later changing to dark green. Likes moist soil and some protection from strong winds.			
Thuja plicata Copper Kettle	5	Green/Orange	Intermediate 100cm
Orangy new growth turning to dark green. Small upright Pyramidal tree.			
Thuja plicata Collyer's Gold	5	Green/ Gold	Intermediate 100cm
New growth gold tipped before changed to dark green. Compact and oval shaped.			
Thuja plicata Excelsa	5	Green	Large 150cm
A very fast growing form that is reportly more hardy than the species.			
Thuja plicata Extra Gold	5	Yellow	Large 150cm
Nice yellow colour year round. Grows fairly fast. Becomes a dense stately pyramid.			
Thuja plicata Gederland	5	Green	Large 175cm
Very fast growing form of the species nice pyramidal shape.			
Thuja plicata Hillier	5	Green	Dwarf 100cm
Dwarf upright pyramid. Grows fairly slowly.			
Thuja plicata Holly Turner	5	Green	Large 150cm
Beautiful weeping form. Pendulous in all respects.			
Thuja plicata Pygmae	5	Green	Dwarf 80cm
Globe form of dark green needles.			
Thuja plicata Sunshine	5	Gold/Green	Large 175cm
A "wow" selection. New growth deep gold with changing to green but the tips still stay gold year round.			
Thuja plicata x standishii Green Giant	5	Green	Large 200cm+

A very fast growing hybrid up to 3 feet a year. Dark green pyramid. Much hardier than straight plicata.

### Japanese Cedar

Thuja standishii 4 Green Large 150cm  
 Slow growing species with nodding branchlets. Looks similar to Chamaecyparis nootkatensis. Very hardy. Should be used more.

### Elk Horn Cedar

Thujopsis dolobrata var. Hondai 5 Green Intermediate 120cm  
 A fascinating shrub or small tree that has literally been unchanged for millions of years. Looks prehistoric. Pest free. Shade tolerant. Unique.

Thujopsis dolobrata Aurea 5 Yellow Intermediata 120cm  
 A pretty soft yellow form. Grows pyramidal.

Thujopsis dolobrata Compacta 5 Green Dwarf 80cm  
 A dwarf round bush with small scale like leaves. Very unique appearance.

Thujopsis dolobrata Variegata 5 Green/White Intermediate 120cm  
 A beautiful selection of this ancient tree. Splashes of white throughout. Tolerates shade.

### Canadian Hemlock

Tsuga canadensis 4 Green Large 120cm  
 Native evergreen. Slower growing. Likes cool moist sites.

Tsuga canadensis Albo Spica 4 Green/White Large 120cm  
 New growth pure white later changing to green. Faster growing than other white tipped forms. Plant away from direct afternoon sun. Grows about 6 inches.

Tsuga canadensis Baldwin's Dwarf Pyramid 4 Green Dwarf 80cm  
 Tight dark green pyramid with twisted branches. Grows 2 inches a year.

Tsuga canadensis Bennett 4 Green Dwarf 60cm  
 A dwarf round flat plant. Tips of branches are pendulous.

Tsuga canadensis Burkett's White Tipped 4 Green/White Dwarf 100cm  
 Slower growing and more compact than Albo Spica. Plant out of direct afternoon sun. Grows about 4 inches.

Tsuga canadensis Coles Prostrate 4 Green Dwarf 80cm  
 True creeping selection that forms a mat. Excellent for cascading over rocks and walls in a semi shaded area.

Tsuga canadensis Elmwood Dwarf 4 Green Dwarf 80cm  
 Nest type when young. Should produce a leader. The silvery Stomates show nicely. Grows 4 inches a year.

Tsuga canadensis Emerald Fountain 4 Green Intermediate 100cm  
 New. Info coming.

Tsuga canadensis Everitt's Golden 4 Gold Dwarf 100cm  
 Beautiful dense pyramid of deep yellow. Fully hardy but needs to be planted away from the afternoon sun.

Tsuga canadensis Fastigiata 4 Green Intermediate 100cm  
 Narrow upright form with all branches ascending. Can grow 6 or more inches a year.

Tsuga canadensis Frosty 4 Green/White Dwarf 100cm  
 Irregular upright growing dwarf with lots of white throughout. Needs shade for protection.

Tsuga canadensis Gables Weeping 4 Green Dwarf 80cm  
 Elegant dwarf weeping form. Never seem a large specimen yet.

Tsuga canadensis Geneva	4	Green	Dwarf	100cm
A very dense pyramid of dark green needles. Makes a perfect specimen in time. Grows 4-6 inches a year.				
Tsuga canadensis Gentsch White	4	White/Green	Intermediate	100cm
A dwarf mound that becomes more pyramidal with age. New growth white turning green later. Quite stunning.				
Tsuga canadensis Golden Splendor	4	Gold	Intermediate	120cm
A pyramidal tree with yellow needles. Should placed in a protected area.				
Tsuga canadensis Gothic	4	Green	Dwarf	80cm
Don't know much about this dwarf at present.				
Tsuga canadensis Gracilis	4	Green	Dwarf	80cm
Dwarf spreading form. Quite slow growing.				
Tsuga canadensis Green Spray	4	Green	Dwarf	100cm
Spreading type with arching branches. Grows about 6 inches a year.				
Tsuga canadensis Horsford Contorted	4	Green	Intermediate	100cm
Irregular shrub type with very contorted branching to the point of curling. Grows 4 inches a year.				
Tsuga canadensis Humphrey Welch	4	Dwarf	Dwarf	100cm
Slow growing pyramidal with tiny needles. Grows about 3 inches a year. Nice rock garden plant.				
Tsuga canadensis Jeddoloh	4	Green	Dwarf	60cm
A round flat plant. Leaves light green. Grows about 4 inches a year.				
Tsuga canadensis Little Snow	4	Green/White	Dwarf	80cm
Mounding little dwarf with white needles. Needs protection from hot afternoon sun. Grows about 2 inches a year.				
Tsuga canadensis Mitsch #2	4	Green	Dwarf	60cm
Super slow and tight growing dwarf. Rock garden plant. Grows 1-2 inches a year.				
Tsuga canadensis Mount Rainier	4	Green/White	Dwarf	80cm
Shrub type with white variegation throughout the plant. New afternoon shade. Grows 3-4 inches a year.				
Tsuga canadensis New Gold	4	Gold/Green	Intermediate	120cm
Striking deep yellow new growth that contrasts with its older dark green needles. Upright growing. Stunning plant.				
Tsuga canadensis Pendula	4	Green	Intermediate	100cm
A popular weeping tree. Strictly pendulous branches. Stake for height. Grows about 1 foot a year.				
Tsuga canadensis Pomfret	4	Green	Dwarf	100cm
Semi dwarf columnar form. Stays very narrow. Cones early.				
Tsuga canadensis Schubert's White	4	Green/White	Intermediate	100cm
New growth pure white, later turning green leaving a white frosting on the needles.				
Tsuga canadensis Silver Bridge	4	Green	Dwarf	80cm
New. Info coming.				
Tsuga canadensis Slenderella	4	Green	Intermediate	120cm
Very tiny needles give this selection a wispy look. Upright growing, prune for density. Grows 6 inches a year.				
Tsuga canadensis Stewarts Gem	4	Green	Dwarf	60cm
Ball or domed shaped dwarf with slightly twisted branching. Grows about 3 inches a year.				
Tsuga canadensis Summer Snow	4	Green/White	Intermediate	120cm
Conical tree with a white frosting throughout the year. Very'				

Showy. Grows about 6 inches a year.

Tsuga canadensis Tim's Gold	4	Green/Gold	Large	120cm
Medium green in summer turning gold in winter. Somewhat open growing tree. Responds well to shearing.				
Tsuga canadensis Vermeulen Wintergold	4	Green/ Gold	Large	120cm
Fairly narrow upright. Green in summer turning a bright yellow in winter. Can grow 6 inches a year.				
Tsuga caroliniana La Bar's Weeping	4	Green	Intermediate	120cm
A weeping variety of Carolina Hemlock. Grows about 6 inches a year.				
Tsuga caroliniana Turner's Weeping	4	Green	Intermediate	120cm
Another weeping form found. Grows 4-6 inches a year.				
Tsuga diversifolia	5	Green	Larger	120cm
Attractive Japanese species that shows more of its silvery stomates than our native hemlock. Grows to 60 feet.				
Tsuga diversifolia Manifold	5	Green	Dwarf	60cm
Small bun type of dark green needles. About 2 inches a year.				
Tsuga mertensiana	5	Green	Large	80cm
Native to the mountains along the west coast. Grows about 1 foot a year. Doesn't like drying winter winds.				

#### **Wollemia Pine**

Wollemia nobilis	7	Green	Large	100cm
An Australian species only discovered in 1994. Only 40 adult trees remain in the wild. This ancient plant may have existed already on this planet for 200 million years.				
<b>MUST be potted cultured in our climate!</b>
